Phonétique

historique du français et notions de phonétique générale Jean-Marie Pierret, 1994 Nouvelle édition entièrement revue d'un manuel destiné aux étudiants et aux lecteurs cultivés désireux de s'initier à la phonétique et à l'histoire de la prononciation du français cet ouvrage contient deux grandes parties une initiation à la phonétique générale et un panorama de la phonétique historique du français Les notions de phonétique générale se basent surtout sur l'observation du français contemporain Elles ont pour but de faire prendre conscience au lecteur francophone habitué à accorder une attention toute particulière à la forme écrite des messages que toute langue est d'abord un phénomène oral Un bref aperçu de phonétique acoustique est suivi d'une longue description des mécanismes articulatoires mis en œuvre pour la production des sons qui composent les langues et des modifications que subissent ces sons lorsqu'ils sont insérés dans la chaîne parlée Si la forme écrite des messages des locuteurs francophones est presque toujours unique il en va tout autrement de leur forme orale et les mêmes énoncés se trouvent réalisés dans des prononciations bien différentes dans les diverses régions de la francophonie Dès lors se pose un problème de norme quelle prononciation recommander ou admettre C'est à la phonétique normative ou orthoépique qu'il revient de répondre à cette question et de proposer des conseils portant sur des points plus particuliers comme la prononciation des noms propres la liaison ou l'élision du e muet L'exposé de cette partie normative est spécialement attentive aux principales caractéristiques du français de Wallonie et de Bruxelles Les graphies du français souvent fort complexes gardent le témoignage de prononciations anciennes et montrent que les sons évoluent Ainsi les voyelles contenues dans *beau fleur main sœur* étaient autrefois des sons complexes la liaison en *t* que l'on fait après l'adjectif *grand* rappelle qu'au moyen âge la consonne finale de cet adjectif était une sourde *grant* La phonétique historique une des premières disciplines élaborées par la linguistique scientifique a établi que ces évolutions ne se sont pas faites de manière aléatoire La dernière partie du manuel décrit ces évolutions du latin au français et montre comment s'est constitué le phonétisme du français contemporain Elle insiste particulièrement sur les traits qui distinguent le français des autres langues romanes et c'est là qu'elle relève les phénomènes qui sont responsables de la différenciation des dialectes de la Wallonie L'ouvrage est enrichi de nombreuses illustrations qui rendent les exposés plus concrets et il se termine par trois index un index analytique contenant tous les termes techniques utilisés un index des étymons et un index des mots français cités dans la partie historique Florilegium Historiographiae Linguisticae Jan De Clercq, Piet Desmet, 1994 Peeters 1994

Nominatif, Vocatif, Accusatif, Génétif, Datif*, 1994 *Espaces fonctionnels de la subordination complétive en latin* Colette Bodelot, 2000 Cette réflexion sur le procédé de la subordination complétive en latin s'entend comme une

recherche sur corpus qui vise à décrire le fonctionnement de la langue à travers les textes. Ce qui est en cause, c'est le phénomène de la subordination complétive dans tous ses états. Se distinguant de la subordination circonstancielle et relative par des limites souvent fluides, la subordination complétive s'accommode de nombreux lieux d'ambiguïté. L'impression qui se dégage est celle d'une transitivité à géométrie variable. Apparaissant à la base comme un mécanisme fonctionnel et syntaxique qui respecte les contraintes fondamentales de l'agencement de la phrase, ce type de subordination révèle à un second niveau l'intrusion d'un locuteur ou d'un scripteur qui tente de concilier au sein d'un énoncé original les exigences de la situation de parole avec son propre élan de spontanéité. Saisir les moyens visibles et cachés d'une construction de sens à travers une structure syntaxique déterminée, tel est un des volets essentiels de cette recherche qui à ce titre s'adresse non seulement à des latinistes mais à tous les linguistes s'intéressant au fonctionnement sémantique du syntaxique ainsi qu'à la problématique des degrés d'analyse.
