## Dead Hand Control:

**Autonomous Organizations** Shawn Bayern, 2021-10-14 Under current business law it is already possible to give legal personhood or a very close surrogate of it to software systems of any kind from a simple automated escrow agent to a more hypothetical truly smart artificial intelligence This means that for example robots could enter into contracts serve as legal agents or own property Ultimately entire companies could actually be run by non human agents This study argues that this is not as scary as it might sound at first Legal theorist and noted software developer Shawn Bayern argues that autonomous or zero person organizations offer an opportunity for useful new types of interactions between software and the law This creative contribution to the theory and practice of law and technology explores the social and political aspects of these new organizational structures and their implications for legal theory

**Comparative Corporate Governance of Non-Profit Organizations** Klaus J. Hopt, Thomas Von Hippel, 2010-04-22 The economic importance of the non profit sector is growing rapidly in the USA and Europe However the law has not kept abreast with its development The European Court of Justice has extended certain freedoms of the EC Treaty to non profit organisations and more case law is expected to follow in the near future but the observations theories solutions and legal and non legal rules in this field are manifold The chances of harmonising the law on a European level are slim Despite these differences a common core of international corporate governance problems and regulatory solutions can be seen This volume of essays brings together a variety of international experts from both corporate governance and governance of non profit organisations to compare the two areas and explore the lessons that can be learned regarding comparative corporate governance for non profit organisations

**Death by a Thousand Cuts** Angela M. Vallario, 2010 This article suggests the policy and social justifications against dead hand control far outweigh transfer tax advantages provided to wealthy settlers and the potential revenue expected to be generated by the abolishment legislation The abolishment legislation may be readily adopted by other jurisdictions in light of the legislatures failure to recognize the consequences of unlimited dead hand control This article recognizes that the Rule is complicated and Rule violations present harsh consequences for practitioners and their clients In fact violations of the Rule due to its complexity have been held as an attorney error not subject to a malpractice claim The complexities of the Rule and the harsh consequences for the violations thereof initiated and resulted in the variations of reform A brief discussion of the origin of the Rule basic elements and the modern reform are useful for a fuller understanding of this article s critique of the abolishment legislation After the brief discussion of the Rule and reform this article categorizes

the abolishment legislation as the 1998 abolishment legislation the additional incentive jurisdictions and the forerunners of abolishment After categorizing the abolishment legislation this article compares the arguments against the abolishment legislation to its advantages Furthermore this article emphasizes that the abolishment legislation has ignored dead hand control in favor of providing wealthy settlers with an estate planning tool to minimize federal transfer taxes In conclusion this article suggests that in light of the consequences of dead hand control the abolishment legislation should be stopped Failure to stop the trend among jurisdictions could result in the Federal government curtailing dead hand control
