George, 2020-04-05 What could Greek poets or Roman historians say in their own language that would be lost in translation After all different languages have different personalities and this is especially clear with languages of the ancient and medieval world This volume celebrates six such languages Ancient Greek Latin Old English Sanskrit Old Irish and Biblical Hebrew by first introducing readers to their most distinctive features then showing how these linguistic traits play out in short excerpts from actual ancient texts It explores for instance how Homer s Greek shows signs of oral composition how Horace achieves striking poetic effects through interlaced word order in his Latin and how the poet of Beowulf attains remarkable intensity of expression through the resources of Old English But these are languages that have shared connections as well Readers will see how the Sanskrit of the Rig Veda uses words that come from roots found also in English how turns of phrase characteristic of the Hebrew Bible found their way into English and that even as unusual a language as

Old Irish still builds on common Indo European linguistic patterns Very few people have the opportunity to learn these languages and they can often seem mysterious and inaccessible drawing on a lucid and engaging writing style and with the aid of clear English translations throughout this book aims to give all readers whether scholars students or interested novices an aesthetic appreciation of just how rich and varied they are

Cataloguing the World's Endangered Languages Lyle Campbell, Anna Belew, 2018-02-02 Cataloguing the World's Endangered Languages brings together the results of the extensive and influential Catalogue of Endangered Languages ELCat project Based on the findings from the most extensive endangered languages research project this is the most comprehensive source of accurate information on endangered languages The book presents the academic and scientific findings that underpin the online Catalogue located at [www.endangeredlanguages.com](http://www.endangeredlanguages.com) making it an essential companion to the website for academics and researchers working in this area While the online Catalogue displays much data from the ELCat project this volume develops and emphasizes aspects of the research behind the data and includes topics of great interest in the field not previously covered in a single volume Cataloguing the World's Endangered Languages is an important volume of particular interest to academics and researchers working with endangered languages

**Dead Languages** David Shields, 1990 From the moment his mother tries unsuccessfully to coax him into saying Philadelphia Jeremy Zorn's life is framed by his unwieldy attempts at articulation Through family rituals with his word obsessed parents and sister failed first love an ill fated run for class president as the only Jewish boy on an otherwise all black basketball team all of the passages of Jeremy's life are marked in some way by his stutter and his wildly off the mark attempts at a cure It is only when he enters college and learns his strong willed mother is dying that he realizes all languages when used as hiding places for the heart are dead ones

*Encyclopedia of the World's Endangered Languages* Christopher Moseley, 2008-03-10 The concern for the fast disappearing language stocks of the world has arisen particularly in the past decade as a result of the impact of globalization This book appears as an answer to a felt need to catalogue and describe those languages making up the vast majority of the world's six thousand or more distinct tongues which are in danger of disappearing within the next few decades Endangerment is a complex issue and the reasons why so many of the world's smaller less empowered languages are not being passed on to future generations today are discussed in the book's introduction The introduction is followed by regional sections each authored by a notable specialist combining to provide a comprehensive listing of every language which by the criteria of endangerment set out in the introduction is likely to disappear within the next few decades These languages make up ninety per cent of the world's remaining language stocks Each regional section comprises an introduction that deals with problems of language preservation peculiar to the area surveys of known extinct languages and problems of classification The introduction is followed by a list of all known languages within the region endangered or not arranged by genetic affiliation with endangered and extinct languages marked This listing is followed by entries in alphabetical order covering each language listed as

endangered Useful maps are provided to pinpoint the more complex clusters of smaller languages in every region of the world The Encyclopedia therefore provides in a single resource expert analysis of the current language policy situation in every multilingual country and on every continent detailed descriptions of little known languages from all over the world and clear alphabetical entries region by region of all the world s languages currently thought to be in danger of extinction The Encyclopedia of the World s Endangered Languages will be a necessary addition to all academic linguistics collections and will be a useful resource for a range of readers with an interest in development studies cultural heritage and international affairs

Whaley, 1998-03-26 This book provides an overview of the issues surrounding language loss It brings together work by theoretical linguists field linguists and non linguist members of minority communities to provide an integrated view of how language is lost from sociological and economic as well as from linguistic perspectives The contributions to the volume fall into four categories The chapters by Dorian and Grenoble and Whaley provide an overview of language endangerment Grinevald England Jacobs and Nora and Richard Dauenhauer describe the situation confronting threatened languages from both a linguistic and sociological perspective The understudied issue of what beyond a linguistic system can be lost as a language ceases to be spoken is addressed by Mithun Hale Jocks and Woodbury In the last section Kapanga Myers Scotton and Vakhtin consider the linguistic processes which underlie language attrition

The Oxford Handbook of Endangered Languages Kenneth L. Rehg, Lyle Campbell, 2018-07-18 The endangered languages crisis is widely acknowledged among scholars who deal with languages and indigenous peoples as one of the most pressing problems facing humanity posing moral practical and scientific issues of enormous proportions Simply put no area of the world is immune from language endangerment The Oxford Handbook of Endangered Languages in 39 chapters provides a comprehensive overview of the efforts that are being undertaken to deal with this crisis A comprehensive reference reflecting the breadth of the field the Handbook presents in detail both the range of thinking about language endangerment and the variety of responses to it and broadens understanding of language endangerment language documentation and language revitalization encouraging further research

The Handbook is organized into five parts Part 1 Endangered Languages addresses the fundamental issues that are essential to understanding the nature of the endangered languages crisis Part 2 Language Documentation provides an overview of the issues and activities of concern to linguists and others in their efforts to record and document endangered languages Part 3 Language Revitalization includes approaches practices and strategies for revitalizing endangered and sleeping dormant languages Part 4 Endangered Languages and Biocultural Diversity extends the discussion of language endangerment beyond its conventional boundaries to consider the interrelationship of language culture and environment and the common forces that now threaten the sustainability of their diversity Part 5 Looking to the Future addresses a variety of topics that are certain to be of consequence in future efforts to document and revitalize endangered languages

When Languages Die K David Harrison, 2008-07-21 It is commonly agreed by linguists and anthropologists that the majority of languages spoken now around the globe will likely disappear within our lifetime The phenomenon known as language death has started to accelerate as the world has grown smaller This extinction of languages and the knowledge therein has no parallel in human history K David Harrison's book is the first to focus on the essential question what is lost when a language dies What forms of knowledge are embedded in a language's structure and vocabulary And how harmful is it to humanity that such knowledge is lost forever Harrison spans the globe from Siberia to North America to the Himalayas and elsewhere to look at the human knowledge that is slowly being lost as the languages that express it fade from sight He uses fascinating anecdotes and portraits of some of these languages last remaining speakers in order to demonstrate that this knowledge about ourselves and the world is inherently precious and once gone will be lost forever This knowledge is not only our cultural heritage oral histories poetry stories etc but very useful knowledge about plants animals the seasons and other aspects of the natural world not to mention our understanding of the capacities of the human mind Harrison's book is a testament not only to the pressing issue of language death but to the remarkable span of human knowledge and ingenuity It will fascinate linguists anthropologists and general readers

**Language Endangerment is an Important Issue** Corinna Colette Vellnagel, 2011-07-11 Essay from the year 2011 in the subject Speech Science Linguistics grade Excellent The University of Surrey language English abstract Tarn palk enim ab uo tund Only a handful of people are still able to understand these Livonian words Viitso 1990 Reasons why languages such as Livonian are becoming extinct are manifold and the estimated 7000 languages which are being spoken around the world Colls 2009 p 1 are expected to rapidly shrink in the upcoming decades It is obvious that language extinction and language death have reached an exceptional level in recent years and that the forecast for a striking percentage of the world's dying languages is very high Hale et al 1992 An untold number of languages has already died and the disappearance of languages continues Wurm 1991 p 1 constantly One reason

for this loss is the fact that more and more people switch to one of the dominant languages especially English and Deterding 2004 p 27 in consequence miss out on transmitting their endangered indigenous language to their descendents Crystal 2000 The problem of language death has only been discovered in the late 1980 s and it is assumed that within this century 50% of the currently spoken languages will become extinct and that another 40% will be endangered so that their extinction is no longer ne avoidable but only if this trend continues Krauss 1992 Although this estimation might sound very pessimistic it is obvious that a drastic reduction of language diversity is on its way In these premises thoughts about how to countervail the reduction of diversity have come up within the last couple of years Hale et al 1992 Bobaljik et al 1996 Grenoble and Whaley 1998 with one possibility being to respond to the dying of languages by extensively documenting endangered languages before they actually become extinct Considering the extent and the speed in which languages die out the task to document is particularly imperative
