Meritocracy Myth Stephen J. McNamee,2023-07-17 There is a pervasive ideology that claims America is a land of unlimited opportunity and people get out of the system what they put into it based on talent attitude hard work and character *The Meritocracy Myth Who Gets Ahead and Why* deconstructs this idea by identifying factors that suppress neutralize or negate merit based traits These include economic inheritance who you know social capital and fitting in cultural capital being at the right place at the right time unequal access to educational opportunities and discrimination based on race sex age sexual orientation physical disability religion and physical appearance Discussion questions at the end of each chapter encourage students to think critically and develop a deeper understanding of why some people succeed and others fail New to the Fifth Edition New discussion of national college admission scandal highlights how educational opportunities are mediated by social class Chapter 5 Revised Chapter 7 The Luck Factor includes discussions of how the COVID 19 pandemic manufacturing of critical goods in the U S and the oversupply of college graduates impact the likelihood of intergenerational mobilityNew discussion on reparations as a way to address inequality for historically discriminated against groups reflects current debates Chapter 10 New discussion of murders of Black suspects by police Black Lives Matter and the Dobbs Supreme Court decision illustrate ongoing patterns of discrimination that impact the prospects of Americans Chapter 9 *Crisis Patient*

Prioritisation and the Law: The Pandemic Experience Massimo Foglia,Tomáš Holcapek,Martin Šolc,Petr Šustek,2024-09-20 The allocation of scarce health resources remains a persistent and critical challenge for global health systems The Covid 19 pandemic brought this issue to the forefront on an unprecedented scale testing even the most robust health systems of industrialised nations Depletion of resources particularly in intensive care units forced daily triage decisions Each country

facing its unique circumstances had to devise its own solution to the sudden calamity While universal principles applied the book presents eleven comprehensive national reports from Europe North and South America and Africa These reports are structured to facilitate a nuanced comparison of individual strategies as well as overarching systematic differences In addition to the national perspectives the book includes a dedicated theoretical chapter analysing the legal ethic foundations and limits of crisis patient prioritisation As the urgency of the Covid 19 pandemic wanes in the public eye and among stakeholders there is a concerning lack of willingness to extract vital lessons for future crises Nevertheless neglecting the insights gained from the events of 2020 and 2021 would be a grave error The book aspires to preserve the lessons of the pandemic offering valuable insights to those who seek better preparation for potential future crises
