Artificial Intelligence for Marketing Jim Sterne, 2017-08-02 A straightforward non technical guide to the next major marketing tool Artificial Intelligence for Marketing presents a tightly focused introduction to machine learning written specifically for marketing professionals This book will not teach you to be a data scientist but it does explain how Artificial Intelligence and Machine

Learning will revolutionize your company's marketing strategy and teach you how to use it most effectively. Data and analytics have become table stakes in modern marketing but the field is ever evolving with data scientists continually developing new algorithms where does that leave you? How can marketers use the latest data science developments to their advantage? This book walks you through the need to know aspects of Artificial Intelligence including natural language processing, speech recognition and the power of Machine Learning to show you how to make the most of this technology in a practical, tactical way. Simple illustrations clarify complex concepts and case studies show how real world companies are taking the next leap forward. Straightforward, pragmatic and with no math required, this book will help you speak intelligently about Artificial Intelligence and its advantages in marketing. Understand how marketers without a Data Science degree can make use of machine learning technology. Collaborate with data scientists as a subject matter expert to help develop focused use applications. Help your company gain a competitive advantage by leveraging leading edge technology in marketing. Marketing and data science are two fast moving, turbulent spheres that often intersect; that intersection is where marketing professionals pick up the tools and methods to move their company forward. Artificial Intelligence and Machine Learning provide a data driven basis for more robust and intensely targeted marketing strategies and companies that effectively utilize these latest tools will reap the benefit in the marketplace. Artificial Intelligence for Marketing provides a nontechnical crash course to help you stay ahead of the curve.

Analysing Student Feedback in Higher Education Elena Zaitseva, Beatrice Tucker, Elizabeth Santhanam, 2021-12-29. Analysing Student Feedback in Higher Education provides an in depth analysis of mining student feedback that goes beyond numerical measures of student satisfaction or engagement. By including authentic student voices for understanding the student experience, this book will inform strategies for quality improvement in higher education globally. With contributions representing an international community of academics, educational developers, institutional data analysts and student researchers, this book reflects on the role of computer aided text analysis in gaining insight of student views. The chapters explore the applications of text mining in different forms; these include varied institutional contexts using a range of instruments and pursuing different institutional aims and objectives. Contributors provide insights enabled by computer aided analysis in distilling the student voice and turning large volumes of data into useful information and knowledge to inform actions. Practical tips and core principles are explored to assist academic institutions when embarking on analysing qualitative student feedback. Written for a wide audience, Analysing Student Feedback in Higher Education provides those making informed decisions about how to approach analyses of large volumes of student narratives with the benefit of learning from the experiences of those who already started treading this path. It enables academic developers, institutional researchers, academics and administrators to see how bringing text mining to their institutions can help them in better understanding and using the student voice to improve practice. **PC AI**, 2001
