Immunotherapy has emerged as a transformative domain within oncology and a variety of other medical fields demonstrating its potential through the use of immune checkpoint inhibitors adoptive cell therapies and monoclonal antibodies These strategies have significantly improved cancer treatment outcomes and broadened therapeutic horizons Nonetheless the clinical application of numerous therapeutic and diagnostic targets remains limited reducing the translational impact of molecular biology advances NSG based technologies focusing on B and T cell receptor repertoires have enabled the development of next generation immunotherapies such as CAR therapies engineered antibodies and bispecific antibodies enhancing treatment options across infectious diseases autoimmune disorders and cancers This Research Topic aims to provide a comprehensive summary of current methodologies used in the creation and development of pertinent immunotherapies It seeks to present an up to date exploration of the rapidly evolving fields of antibody development and immune receptor repertoire analysis emphasizing their clinical relevance across various disease states including autoimmune and infectious diseases and particularly cancer To expand the boundaries of molecular immunology and immunotherapy development this Research Topic encourages contributions that explore diverse aspects including but not limited to o Novel techniques for discovering and crafting antibodies and receptor specific molecules ScFv VHH o Innovative methods for identifying antigens associated with antibodies and TCRs o Creation of databases cataloging T and B cell receptor repertoires from individuals and patients exposed to specific conditions o Preclinical studies validating the efficacy of targeted immunotherapies and diagnostics such as CAR therapies ADCs BiTEs and companion diagnostics With the adoption of advanced tools like NGS in receptor complexity analysis and screening the future of immunotherapy looks promising potentially ushering in a new era of enhanced specificity and efficacy in treatment across multiple diseases Contributions ranging from original research articles to comprehensive reviews are welcomed to deepen understanding and push the boundaries of this exciting field Manuscripts consisting solely of bioinformatics or computational analysis of public genomic or transcriptomic databases which are not accompanied by robust and relevant validation clinical cohort or biological validation in vitro or in vivo are out of scope for this topic

Radical Reporting Sara I. James,2025-01-31 If I were giving out an award for book of the year for internal audit professionals I would certainly award it to her outstanding manuscript *Radical Reporting Writing Better Audit Risk Compliance and Information Security Reports* Richard Chambers Former President and CEO The Institute of Internal Auditors Most people dread writing reports they also dread reading reports What they don't realize is that the techniques that make writing more readable make it more powerful This is especially relevant for professionals in areas such as audit risk compliance and information security This small volume provides the tools and

techniques needed to improve reports It does so through addressing crucial concepts all too often overlooked in the familiar rush to perform tasks complete projects and meet deadlines These concepts the role of culture in communication the link between logic and language the importance of organizing thoughts before writing and how to achieve clarity may seem academic or theoretical They're not Unless writers understand their own thoughts actions and objectives they cannot hope to communicate them at all let alone clearly This second edition develops these points with additional material on critical thinking as well as the use of AI in reporting
