*The Cradle of Words* Valeria López Fadul, 2025-01-14 How languages served as archives of local knowledge and a crucial resource for both the human and natural history of the Americas in the Spanish empire In the sixteenth century the conquest of the Americas exposed Spanish writers to previously unknown peoples and their many languages The linguistic multiplicity of the new transatlantic empire presented enormous challenges both in terms of governance and religious conversion Yet it also became a crucial resource for learning about the new territories history both natural and human In *The Cradle of Words* Valeria López Fadul reveals that Spanish scholars missionaries and administrators treated the empire's multiple tongues both at home and abroad as rich archives of local knowledge These linguistic resources were exploited alongside the Americas vast mineral and natural wealth and Indigenous labor In the process Spanish scholars made language itself into an object of historical inquiry Using a wide variety of sources López Fadul recreates the intellectual networks that crisscrossed Spain's overseas possessions and informed the imperial court's scholars As linguistic information circulated among different kinds of scholars and local experts in Spain and in Spanish America the history of language came to serve historical political and even legal arguments that were not originally linguistic in nature By relying on varied methods like the collection of words etymology and the elaboration of linguistic genealogies Spanish writers used the history of language to reconstruct the past gain knowledge of nature and explain the profound social transformations of their newly broadened world

**At the Table** Timothy J. Tomasik, Juliann M. Vitullo, 2007 This volume surveys recent studies of the metaphorical and material facets of food in medieval and early modern Europe Ranging from literary historical and political analyses to archaeological and botanical ones this collection explores food as a nexus of pre-modern European culture Food and feasting are understood not simply as the consumption of material goods but also as the figurative and symbolic representations of culture which Mauss has termed a total social fact To understand the myriad ways in which discourses about food and feasting are mobilized during this period is to better understand the fundamental role food and feasting played in the development of Europeans' habitual patterns of behaviour and of thought
