Ethical concerns such as privacy bias and accountability are addressed advocating for responsible AI practices. This volume is a comprehensive resource for researchers and enthusiasts offering both theoretical insights and practical guidance on building lifelike digital entities and fostering emotionally engaging human computer interactions.

Pornocracy Jo Bartosch, Robert Jessel, 2025-10-21 They say everybody uses porn. They're wrong. People don't use pornography; it uses us. And you don't have to watch it to be one of its victims. In this thought provoking and timely book Jo Bartosch and Robert Jessel expose how the multi billion dollar pornography industry has humanity gripped in a chokehold. From rewiring our brains and normalising sexual violence to shaping new protest movements the pornographic revolution has achieved a stunning and near total victory. The triumph of the pornocrats is made more sinister by society's widespread acceptance that all men watch porn the denial of its devastating harms and a lack of political will to curb the power of the global pornography business. The authors answer the questions that politicians and policymakers are too scared to ask. Why despite over half a century of feminist gains and lessons in schools on consent do today's school children display more sexist attitudes than their parents and grandparents? Do women really want to be choked and humiliated in bed? How can we fight back and reclaim sex love and relationships? Drawing on the latest research Pornocracy charts how the neurological shifts caused by porn use reverberate through society. The book also warns

of a dystopian future where AI powered porn and sextech threaten to reduce us all to masturbating meat puppets on an algorithmic production line Provocative and powerful Pornocracy tells the story of how pornography fundamentally changed perhaps forever what it is to be human **Digitalization and Women's Rights** Muharrem Kılıç, Sezer Bozkuş Kahyaoglu, 2025-10-20 Technological advancements frequently hinder the progress of women in the business sphere In our current landscape the rapid evolution of technology driven by digital transformation has created significant barriers to women's participation This has given rise to new forms of discrimination that often go unacknowledged and unaddressed The unfortunate reality is that this issue is sidelined in discussions about the economy and broader implications for employment We must recognize and confront the unique challenges women face in this technological age as their exclusion not only impacts them but also stifles innovation and growth in our economy It is time to advocate for a more inclusive approach that empowers women in the tech world In this vital context it is essential to recognize the discrimination and emerging challenges that women will face although these issues may not have been previously explored in sufficient detail This work has been thoughtfully created to fill that gap serving as a crucial reference about these matters By shedding light on existing gaps in the research this book promises to enrich future studies and provide invaluable insights for researchers who investigate and evaluate related works One of the most pressing challenges ahead for women in the rapidly evolving digital landscape is understanding and navigating the economic opportunities available to them As we enter this new era women will undergo a transformative journey that demands adaptability and learning in the face of continuous innovation This work aspires to contribute significantly to these conversations and empower women as they embrace the future *Artificial Intelligence and Man-Machine Systems* Heinz Winter, 1986 Automated Knowledge Acquisition Sabrina Sestito, Tharam S.
