The author incorporates research from a range of areas including business economics information science law media studies psychology social informatics and sociology. After an introductory chapter the book is divided into three sections. The first one discusses the underlying ideas and principles including user generated content the architecture of participation data on an epic scale harnessing the power of the crowd openness and the network effect and Web topology. The second section chronologically covers the main types of Web 2.0 services blogs wikis social networks media sharing sites social bookmarking and microblogging. A History of Advertising Jef I Richards, 2022-05-15 Advertising has always been a uniquely influential social force. It affects what we buy what we believe who we elect and so much more. We tend to know histories of other massive social forces but even people working in advertising often have a tenuous grasp of their field's background. This book slices advertising's history into a smorgasbord of specific topics like advertising to children political advertising people's names as advertisements 3D advertising programmatic buying and so much more offering a synopsis of how each developed and the role it played in this discipline. In doing so many firsts are identified such as the first full page color magazine advertisement and the first point of purchase advertisement. This book also reaches back farther in search of the earliest advertisements and it tells the story of the variety of techniques used by our ancestors to promote their products and ideas. Part textbook part reference the book is an advertising museum in portable form suitable for all levels of students scholars and arm chair enthusiasts. Please note that the hardback and eBook formats of this book feature full color printing. The paperback is grayscale.

Internet Memes and Copyright Law Brian Chun Lok Leung, 2025-09-30 This book explores the intricate relationship between copyright law and internet meme culture challenging an assumption that copyright is a barrier to digital creativity. Using the lens of internet memes to analyse copyright law in the context of participatory remix culture the book confronts a common perception that copyright is the destroyer of internet memes on social media platforms. Following the European Union's Copyright Directive widely known as the Meme Ban this book critically examines whether copyright

might instead be reimagined to foster rather than inhibit re creations that define internet meme culture The book argues that this culture directly challenges copyright s core assumptions and proposes a new holistic approach to copyright that distinguishes between traditional and emergent forms of creative processes Arguing for a flexible interpretation of copyright that limits private proprietary rights in the case of internet memes it provides a legal framework to support socio cultural discourse without undermining copyright s foundational principles Covering core copyright concepts such as authorship idea expression originality fair dealing and user rights the book provides a compelling argument as to how copyright can adapt to the digital age as a protector of cultural expressions ensuring that internet memes are not only preserved but celebrated The book will be of interest to researchers in the field of copyright law the law of emerging technologies and intellectual property law
