Creative Play For The Developing Child:

Creative Play for the Developing Child Clare Cherry,1976 **Creative Play for the Developing Child** Justin L. Cobb,1968 **Learn to Play** Karen Stagnitti,1998-01 **Children's Imaginative Play** Shlomo Ariel,2002-06-30 In this visit to the wonderland of children s imaginative make believe play readers are be exposed to both a general bird s eye view of the whole of this fascinating realm and to a closer look at its diverse regions This volume examines the borderlines between make believe play and akin phenomena such as dreams drama and rituals Readers will become acquainted with the secret codes of make believe play These codes are activated in both covert and overt power struggles among children as well as in the child s internal theater of emotions Readers will have the opportunity to examine these uses by looking at real life sociodramatic play scenes Also the development of make believe play and its interface with the child s general cognitive and socioemotional development is traced This volume enables readers to consider children of various cultures at play and investigates whether make believe play and its characteristics are universal or culture specific Make believe play has been investigated across fields including cognitive clinical developmental and social psychology as well as linguistics anthropology and sociology In this book a comprehensive integrative model is proposed in which all of these approaches are synthesized into a single coherent whole The unifying hypothesis behind this synthesis is that make believe play is a semiotic system a body of signs and symbols a language by means of which children express themselves and communicate This language enables children to regulate and balance both their inner emotional life and their social life Another central hypothesis is therefore that make believe play functions as an homeostatic feedback mechanism for controlling the level of arousal around the child s central concerns as well as the level of interpersonal conflict around issues of social proximity and power Therapeutic and education applications of make believe play are derived from these hypotheses and their ramifications

The Developing Child in the 21st Century Sandra Smidt,2013-06-19 Offering a sociocultural approach to education and learning this fascinating exploration of childhood provides an in depth understanding of how children make sense of the world and the people in it Examining the ways in which children express their thoughts feelings and actively generate meaning through experience and interaction this fully revised and updated new edition is illustrated throughout by extensive case studies and covers a diverse range of topics including socio historical and global child development over time and place the child as meaning maker and active learner learning in the context of family culture group society representing and re representing the world understanding roles identity race and gender making sense of science and technology the implications of neuroscience Taking a clearly articulated and engaging perspective Sandra Smidt draws upon multiple sources and ideas to illustrate many of the facets of the developing child in a contemporary context She depicts children as symbol users role players investigators and creative thinkers and follows children s progress in forming their understanding of their environment asking questions about it and expressing it through music dance art and constructive play Highly
