psychology digitization and the creative bureaucracy *Urban Subversion and the Creative City* Oli Mould, 2015-03-27
Check out the author's video to find out more about the book <https://vimeo.com/124247409> This book provides a comprehensive critique of the current Creative City paradigm with a capital C and argues for a creative city with a small c via a theoretical exploration of urban subversion. The book argues that the Creative City with a capital C is a systemic requirement of neoliberal capitalist urban development and part of the wider policy framework of creativity that includes the creative industries and the creative class and also has inequalities and injustices built in. The book argues that the Creative City does stimulate creativity but through a reaction to it, not as part of it. Creative City policies speak of having mechanisms to stimulate individual, collective or civic creativity yet through a theoretical exploration of urban subversion, the book argues that to be truly creative is to be radically different from those creative practices that the Creative City caters for. Moreover, the book analyses the role that urban subversion and subcultures have in the contemporary city in challenging the dominant political economic hegemony of urban creativity. Creative activities of people from cities all over the world are discussed and critically analysed to highlight how urban creativity has become co-opted for political and economic goals but through a radical reconceptualisation of what creativity is that includes urban subversion, we can begin to realise a creative city with a small c.

The Creative City in Britain and Germany Charles Landry, 1996 **Handbook of Creative Cities** D. E. Andersson, E. Andersson, Charlotta Mellander, 2011-01-01 With the publication of *The Rise of the Creative Class* by Richard Florida in 2002, the creative city became the new hot topic among urban policymakers, planners and economists. Florida has developed one of three path-breaking theories about the relationship between creative individuals and urban environments. The economist E. Andersson and the psychologist Dean Simonton are the other members of this creative troika. In the *Handbook of Creative Cities*, Florida, Andersson and Simonton appear in the same volume for the first time. The expert contributors in this timely *Handbook* extend their insights with a varied set of theoretical and empirical tools. The diversity of the contributions reflects the multidisciplinary nature of creative city theorizing which encompasses urban economics, economic geography, social psychology, urban sociology and urban planning. The stated policy implications are equally diverse, ranging from libertarian to social democratic visions of our shared creative and urban future. Being truly international in its scope, this major *Handbook* will be particularly useful for policy makers that are involved in urban development, academics in urban economics, economic geography, urban sociology, social psychology and urban planning as well as graduate and advanced undergraduate students across the social sciences and in business.

Brand-building Serena Vicari Haddock, 2010 The aim of this book is to contribute to a critical assessment of the literature on the creative city and to a clarification of some of the many questions that remain unanswered. It is a collection of essays which in the first part addresses concepts and theories of urban development, city marketing and branding presented as a framework in which the discourse of the creative city is embedded. In the second part, four case studies of cities considered to be emblematic of cultural industries (Manchester

Cities and Creativity from the Renaissance to the Present Ilja Van Damme, Bert De Munck, Andrew Miles, 2017-09-18 This volume critically challenges the current creative city debate from a historical perspective In the last two decades urban studies has been engulfed by a creative city narrative in which concepts like the creative economy the creative class or creative industries proclaim the status of the city as the primary site of human creativity and innovation So far however nobody has challenged the core premise underlying this narrative asking why we automatically have to look at cities as being the agents of change and innovation What processes have been at work historically before the predominance of cities in nurturing creativity and innovation was established In order to tackle this question the editors of this volume have collected case studies ranging from Renaissance Firenze and sixteenth century Antwerp to early modern Naples Amsterdam Bologna Paris to industrializing Sheffield and nineteenth and twentieth century cities covering Scandinavian port towns Venice and London up to the French techno industrial city Grenoble Jointly these case studies show that a creative city is not an objective or ontological reality but rather a complex and heterogenic assemblage in which material infrastructural and spatial elements become historically entangled with power laden discourses narratives and imaginaries about the city and urban actor groups
