Creativity Innovation In Information Systems Organizations Contemporary Issues In Information Systems:
Creativity & Innovation in Information Systems Organizations J. Daniel Couger,1996 This supplementary text was designed to introduce creativity and innovation into the Information Systems curriculum Armed with the ability to apply creativity techniques IS students will possess a foundation for lifetime learning that will enable them to develop creative solutions well into the 21st century **Organizational Dynamics of Technology-Based Innovation: Diversifying the Research Agenda** Tom McMaster,David Wastell,Elaine Ferneley,Janice DeGross,2007-06-01 This volume presents papers from the 10th Working Conference of the IFIP WG 8 6 on the adoption and diffusion of information systems and technologies It explores the dynamics of how some technological innovation efforts succeed while others fail The book looks to expand the research agenda paying special attention to the areas of theoretical perspectives methodologies and organizational sectors

The Oxford Handbook of Group Creativity and Innovation Paul B. Paulus,Bernard A. Nijstad,2019-04-30 Although creativity is often considered an individual ability or activity innovation in teams and organizations involves collaboration of people with diverse perspectives knowledge and skills The effective development of collaborative innovations and solutions to problems is critical to the success of teams and organizations but research has also demonstrated many factors which tend to limit the effectiveness of collaborative innovation of groups and teams This volume highlights recent theoretical empirical and practical developments that provide a solid basis for the practice of collaborative innovation and future research It draws from a broad range of research perspectives including cognition social influence groups teams creativity communication networks information systems organizational psychology engineering computer science and the arts This volume is an important source of information for students scholars practitioners and others interested in understanding the complexity of the group creative process and tapping the creative potential of groups and teams **Current Issues on Digital Transformation, Corporate Entrepreneurship, and Coopetition** Anna Ujwary-Gil,2024-01-01 An integrated PLS SEM model on the interplay of antecedents and moderators driving corporate entrepreneurship activity in South Africa PURPOSE Corporate entrepreneurship CE is a multi faceted phenomenon and although there is extant research on CE there are knowledge gaps that warrant a deeper understanding Indeed focusing solely on independent variables overlooks the extent to which CE activities are mutually and reciprocally supportive We align our article with research calls for theory building which provides a novel understanding of the dynamic complexity of the CE process METHODOLOGY In this regard we formulate and empirically evaluate an integrated CE model that reflects the integrative complexity of the antecedents driving CEA The study context is the South African banking sector where primary data n 312 is obtained via a structured survey Four meta hypotheses and several sub hypotheses reflecting the organizational individual and environmental level antecedents are tested using partial least squares structural equation modeling PLS SEM FINDINGS The main study finding validates that corporate strategy is the bedrock of CEA The results also reveal that entrepreneurial strategy entrepreneurial structure

transformational leadership organizational resources and an entrepreneurial mindset are significant predictors of CEA IMPLICATIONS Practical implications highlight that it is important for managers to consider the configuration of the predictors within the CE model which function as pathways to entrepreneurial corporate strategy ORIGINALITY AND VALUE Our study makes a unique contribution by developing and testing an integrated and comprehensive model reflecting the dynamic complexity of the antecedents driving CEA It is anticipated that the results will allow researchers to compare and examine comparable antecedents to CEA and their applicability in global country contexts Keywords corporate entrepreneurship antecedents entrepreneurial strategy organizational resources transformational leadership entrepreneurial mindset partial least squares structural equation modelling PLS SEM South Africa Pushing coopetition research further Understanding relevance and operationalization of the attributes of coopetition strategies and coopetitive relationships PURPOSE Although coopetition was defined three decades ago and is intensively investigated its theoretical and research cognition remains far from thoroughly understood The lack of conceptual consistency prevents researchers from conducting comparable research leading to more generalizable results and thus from building coherent knowledge This study addresses the above shortcoming by the development of operationalizations of two types of attributes assigned to coopetition strategic attributes characterizing coopetition strategies and relational attributes characterizing coopetitive relationships METHODOLOGY In our study we adopted a two step research process consisting of qualitative verification of a list of 8 coopetition attributes 2 strategic and 6 relational identified in prior literature as relevant for coopetition success and the development of integrative conceptualization and measurement approaches for them The verification was conducted through focus group interviews with scholars experienced in coopetition research and senior managers from firms adopting coopetition strategies The measurement approaches for the positively verified attributes were developed through the integration of 1 approaches used so far in coopetition literature 2 approaches used to date in the literature on the features of inter organizational relationships and 3 approaches that emerged during the focus group interviews FINDINGS This study shows two strategic i e dynamics and paradoxicality and six relational i e asymmetry complexity intensity mutual dependence strength and tensions coopetition attributes as heterogeneously relevant for coopetition success and offers multi item operationalizations for them derived from a combination of prior literature and qualitative research IMPLICATIONS Our paper shows strategic and relational attributes of coopetition as theoretically and practically relevant for coopetition success ORIGINALITY AND VALUE As a contribution this study offers scientifically grounded operationalizations of eight attributive success factors of coopetition The developed measurement proposals can find valuable applications in two ways First coopetition researchers can use them in their studies and a consistent measurement approach will allow for the comparison of research results bringing us closer to drawing more general conclusions Second coopetition practitioners can use these proposals when managing coopetition for instance to evaluate monitor and intentionally shape them to make coopetition

more successful Keywords coopetition focus group interviews operationalization measurement scale coopetitive relationships coopetition strategies Guiding incumbent companies in navigating digital transformations A qualitative study on structural ambidexterity and strategic leadership PURPOSE Despite digital transformation being a focus topic for incumbent companies organizational structures are a significant barrier to their success Referring to the positive correlation between ambidexterity and digital innovation our research provides guidance on structural ambidexterity for incumbent companies Previous research has barely differentiated between exploration and exploitation in digital transformation In the present paper we fill part of this research gap by focusing on structural ambidexterity in digital transformations and providing guidance on how incumbent companies can overcome organizational challenges METHODOLOGY Our research is based on an explorative research design with 33 semi structured interviews that allow in depth information The interview partners were selected using purposive sampling and represented different industry and hierarchy levels All of them have been in a position related to digital transformation in an incumbent company for the last two years We ensure scholarly rigor using thematic analysis to analyze our data FINDINGS Our decision tree guides separation or integration based on the closeness of digital activities to the core business and the association of the activities to exploration or exploitation Additionally we recommend considering the digital maturity grade in the decision making Developing a cross functional digital transformation strategy and pursuing a balanced portfolio fosters ambidexterity in digital transformation Clear responsibilities collaborative decision making candidate selection and collaboration with IT are essential leadership activities IMPLICATIONS for theory and practice Our research expands the existing research on digital transformations of incumbent companies We specifically contribute to the limited details on how to separate digital activities considering an exploration exploitation perspective Our study guides practitioners to address one of their major challenges in digital transformations with the help of our decision tree ORIGINALITY AND VALUE Based on the positive correlation between ambidexterity and digital innovation our study contributes to the existing research by providing in depth knowledge of structural ambidexterity in digital transformations This detailed information is essential to provide knowledge on enabling the positive correlation between ambidexterity and innovation in the context of structural ambidexterity Keywords digital transformation digitalization organizational structures structural ambidexterity temporal ambidexterity incumbent companies guidelines Leveraging green innovation from big data analytics Examining the role of resource orchestration and green dynamic capabilities PURPOSE The notion of big data analytics BDA has received increased attention from both researchers and managers Keeping in view the significance of BDA the current research aims to examine the role of BDA capability to leverage firm green innovation GI Drawing from the dynamic capability view current study suggests that BDA capability prompts green dynamic capabilities DCs enabling organizations to attain GI successfully Particularly present study proposes that BDA analytics prompt GI directly as well as through green DCs Moreover this study also draws from complementarity

perspective and proposes that resource orchestration capability ROC is likely to enhance the effectiveness of green DCs in eliciting GI Thus the objectives of the current study are threefold first it aims to unveil the role of BDA capability in prompting GI second it examines the mediating role of green DCs for the relationship between BDA capability and GI and third this research examines the moderating effect of ROC to examine if it strengthens the effects of green DCs METHODOLOGY This study involves testing hypotheses using primary data collected by using the method of survey questionnaire The data were collected from 291 Pakistani organizations Pakistan is an emerging economy where businesses are responsible for substantial amounts of carbon di oxide and greenhouse gasses GHG emissions Therefore Pakistani organizations serve as a suitable context for the study The respondent organizations were from both the manufacturing and service sectors PLS SEM was employed as an analytical approach for testing the hypotheses Construct validity and reliability were confirmed prior to hypotheses testing FINDINGS Results demonstrate that BDA capability positively affects GI 0 33 p
