Crime Protest Community And Police In Nineteenth Century Britain:

Crime, Protest, Community, and Police in Nineteenth-Century Britain David Jones, 2015-08-20 This study first published in 1982 is concerned with the nature of crime in nineteenth century Britain and explores the response of the community and the police authorities Each chapter is linked by common themes and questions and the topics described in detail range from popular forms of rural crime and protest through crime in industrial and urban communities to a study of the vagrant The author pays special attention to the relationship between illegal activities and protest and emphasizes the context and complexity of official crime rates and of many forms of criminal behaviour This title will be of interest to students of history and criminology

Crime and Law in England, 1750-1840 Peter King, 2006-12-07 How was law made in England in the eighteenth and early nineteenth centuries Through detailed studies of what the courts actually did Peter King argues that parliament and the Westminster courts played a less important role in the process of law making than is usually assumed Justice was often remade from the margins by magistrates judges and others at the local level His book also focuses on four specific themes gender youth violent crime and the attack on customary rights In doing so it highlights a variety of important changes the relatively lenient treatment meted out to women by the late eighteenth century the early development of the juvenile reformatory in England before 1825 i e before similar changes on the continent or in America and the growing intolerance of the courts towards everyday violence This study is invaluable reading to anyone interested in British political and legal history

The Cambridge Social History of Britain, 1750-1950 F. M. L. Thompson, 1990 Whilst in certain quarters it may be fashionable to suppose that there is no such thing as society historians they have had no difficulty in finding their subject The difficulty rather is that an outpouring of research and writing is hard for anyone but the specialist to keep up with the literature or grasp the overall picture In these three volumes as is the tradition in Cambridge Histories a team of specialists has assembled the jigsaw of topical monographic research and presented an interpretation of the development of modern British society since 1750 from three perspectives those of regional communities the working and living environment and social institutions Each volume is self contained and each contribution thematically defined contains its own chronology of the period under review Taken as a whole they offer an authoritative and comprehensive view of the manner and method of the shaping of society in the two centuries of unprecedented demographic and economic change

The Civilization of Crime Eric Arthur Johnson, Eric H. Monkkonen, 1996 Along with most of the rest of Western culture has crime itself become more civilized This book exposes as myths the beliefs that society has become more violent than it has been in the past and that violence is more likely to occur in cities than in rural areas The product of years of study by scholars from North America and Europe The Civilization of Crime shows that however violent some large cities may be now both rural and urban communities in Sweden Holland England and other countries were far more violent during the late Middle Ages than any cities are today Contributors show that the dramatic change is due in part to the fact that violence was often tolerated or

even accepted as a form of dispute settlement in village dominated premodern society Interpersonal violence declined in the seventeenth and eighteenth centuries as dispute resolution was taken over by courts and other state institutions and the church became increasingly intolerant of it The book also challenges a number of other historical sociological theories among them that contemporary organized crime is new and addresses continuing debate about the meaning and usefulness of crime statistics CONTRIBUTORS Esther Cohen Herman Diederiks Florike Egmond Eric A Johnson Michele Mancino Eric H Monkkonen Eva sterberg James A Sharpe Pieter Spierenburg Jan Sundin Barbara Weinberger *Law and Society in England 1750-1950* William Cornish, Stephen Banks, Charles Mitchell, Paul Mitchell, Rebecca Probert, 2019-10-31 *Law and Society in England 1750 1950* is an indispensable text for those wishing to study English legal history and to understand the foundations of the modern British state In this new updated edition the authors explore the complex relationship between legal and social change They consider the ways in which those in power themselves imagined and initiated reform and the ways in which they were obliged to respond to demands for change from outside the legal and political classes What emerges is a lively and critical account of the evolution of modern rights and expectations and an engaging study of the formation of contemporary social administrative and legal institutions and ideas and the road that was travelled to create them The book is divided into eight chapters Institutions and Ideas Land Commerce and Industry Labour Relations The Family Poverty and Education Accidents and Crime This extensively referenced analysis of modern social and legal history will be invaluable to students and teachers of English law political science and social history **British Economic and Social History** R. Snyder, 1989 English law was almost unique in that most prosecutions were brought by the police rather than by public prosecutors This book examines why they acquired that power what was its social significance and what was distinctive about its evolution compared with policing in Scotland and Ireland *The Working Class in Britain, 1850-1939* John Benson, 1989 This book analyzes the history of labour from the point of view of the ordinary men and women whose
