The first part is methodological, looking at what values are, why they are important, and how to include values in sustainable development. The second part looks at how values differ across social contexts, religions, and viewpoints, demonstrating how various individuals may value nature from a variety of cultural, social, and religious points of view. The third and final part presents case studies ordered by scale, from the individual and community levels through to the national, regional, and international levels. These examples show how values can motivate, be incorporated into, and be an integral part of the success of a project. This thought-provoking book gives researchers, students, and practitioners in sustainable development a wealth of approaches to include values in their research. *The Mom Economy* Elizabeth Wilcox, 2003 With expert advice from professional counselors, psychologists, and human resource professionals, and from more than 100 working mothers, this practical volume helps moms get what they need most from the workplace and find the work that works for them. *Management* John R.
