Creative Evolution Henri Bergson, Arthur Mitchell, 1998-02-06 Bergson's famous study of the philosophical implications of biological evolutionary theory presenting the idea of a creative life force shaping both the world and itself **Creative Evolution** Henri Bergson, 2015-04-04 Creative Evolution By Henri Bergson Translated by Arthur Mitchell The history of the evolution of life incomplete as it yet is already reveals to us how the intellect has been formed by an uninterrupted progress along a line which ascends through the vertebrate series up to man It shows us in the faculty of understanding an appendage of the faculty of acting a more and more precise more and more complex and supple adaptation of the consciousness of living beings to the conditions of existence that are made for them Hence should result this consequence that our intellect in the narrow sense of the word is intended to secure the perfect fitting of our body to its environment to represent the relations of external things among themselves in short to think matter Such will indeed be one of the conclusions of the present essay We shall see that the human intellect feels at home among inanimate objects more especially among solids where our action finds its fulcrum and our industry its tools that our concepts have been formed on the model of solids that our logic is pre eminently the logic of solids that consequently our intellect triumphs in geometry wherein is revealed the kinship of logical thought with unorganized matter and where the intellect has only to follow its natural movement after the lightest possible contact with experience in order to go from discovery to discovery sure that experience is following behind it and will justify it invariably **Creative Evolution** Henri Bergson, 2015-12-28 Creative Evolution By Henri Bergson Translated by Arthur Mitchell The history of the evolution of life incomplete as it yet is already reveals to us how the intellect has been formed by an uninterrupted progress along a line which ascends through the vertebrate series up to man It shows us in the faculty of understanding an appendage of the faculty of acting a more and more precise more and more complex and supple adaptation of the consciousness of living beings to the conditions of existence that are made for them Hence should result this consequence that our intellect in the narrow sense of the word is intended to secure the perfect fitting of our body to its environment to represent the relations of external things among themselves in short to think matter Such will indeed be one of the conclusions of the present essay We shall see that the human intellect feels at home among inanimate objects more especially among solids where our action finds its fulcrum and our industry its tools that our concepts have been formed on the model of solids that our logic is pre eminently the logic of solids that consequently our intellect triumphs in geometry wherein is revealed the kinship of logical thought with unorganized matter and where the intellect has only to follow its natural movement after the lightest possible contact with experience in order to go from discovery to discovery sure that experience is following behind it and will justify it invariably Creative Evolution French L Evolution creatrice is a 1907 book by French philosopher Henri Bergson Its English translation appeared in 1911 The book provides an alternate explanation for Darwin's mechanism of evolution suggesting that evolution is motivated by an *elan vital* a vital impetus that can also be

understood as humanity's natural creative impulse. The book was very popular in the early decades of the twentieth century before the Neodarwinian synthesis was developed. The book also develops concepts of time offered in Bergson's earlier work which significantly influenced modernist writers and thinkers such as Marcel Proust. For example, Bergson's term *duration* refers to a more individual, subjective experience of time as opposed to mathematical, objectively measurable clock time. In *Creative Evolution*, Bergson suggests that the experience of time as duration can best be understood through creative intuition, not through intellect. Harvard philosopher William James intended to write the introduction to the English translation of the book but died in 1910 prior to its completion. The history of the evolution of life is incomplete as it yet is already revealed to us how the intellect has been formed by an uninterrupted progress along a line which ascends through the vertebrate series up to man. It shows us in the faculty of understanding an appendage of the faculty of acting a more and more precise, more and more complex and supple adaptation of the consciousness of living beings to the conditions of existence that are made for them. [Creative Evolution](#) Amit Goswami, 2014-01-23. By denying evolution altogether, says quantum physicist Amit Goswami, intelligent design believers fly in the face of scientific data. But the idea of intelligent design does contain substance that neo-Darwinists cannot ignore. Goswami posits that consciousness, not matter, is the primary force in the universe. Biology must come to terms with feeling, meaning, and the purposefulness of life, as well as with the idea of a designer. What's more, reconciling the question of life's purposefulness and the existence of the designer with neo-Darwinism also answers many other difficult questions. The result is a paradigm shift for biology and the vision of a coherent whole that Goswami calls

science within consciousness In this timely important book the author offers clear arguments supported by the findings of quantum physics that represent a major step in resolving controversies between science and religion **Creative evolution** Henri Bergson,1911 Creative Evolution (Jovian Press) Henri Bergson,2017-06-22 The most famous and influential work of distinguished French philosopher Henri Bergson Creative Evolution features the fullest expression of the philosopher s ideas about the problem of existence propounding a theory of evolution completely distinct from these of earlier thinkers and scientists In discussing the meaning of life Bergson considers the order of nature and the form of intelligence including the geometrical tendency of the intellect and examines mechanisms of thought and illusion In addition he presents a critique of the idea of immutability and the concept of nothingness from Plato and Aristotle through the evolutionism of his contemporaries Bergson s influence on Marcel Proust and other twentieth century writers renders a grasp of his theories imperative to students of literature as well as philosophy Historians of science and other readers will also appreciate the importance of this milestone in philosophical and evolutionary thought Creative Evolution Revisited Donald C. Austin MD,2010-05-06 Henri Bergson was a great French philosopher whose life overlapped that of Charles Darwin He had serious concerns about Darwins atheistic concept of man and animals evolution Bergson also presented ideas of Intelligent Design almost 200 years prior to it s regeneration in the 20th century My book separates God from Evolution of the cosmos and all it contains by espousing the elan vitale as of God and the true creator of the Universe To Permissions Department To complete my book I need permission to insert portions from your Republishing organization of Science 2003 Author Editor Mohamed A F Noor Publisher Nature Publishing Company an article Donald C Austin MD daledon2 comcast net Creative Evolution (Classic Reprint) Henri Bergson,2017-09-17 Excerpt from Creative Evolution Must we then give up fathoming the depths of life Must we keep to that mechanistic idea of it which the understanding will always give us an idea necessarily artificial and symbolical since it makes the total activity of life shrink to the form of a certain human activity which is only a partial and local manifestation of life a result or by product of the vital process We should have to do so indeed if life had employed all the psychical potential ities it possesses in producing pure understandings that is to say in making geometricians But the line of evolution that ends in man is not the only one On other paths divergent from it other forms of consciousness have been developed which have not been able to free themselves from external constraints or to regain control over them selves as the human intellect has done but which none the less also express something that is immanent and essential in the evolutionary movement Suppose these other forms of consciousness brought together and amalgamated with intellect would not the result be a consciousness as wide as life Qand such a consciousness turning around suddenly against the push of life which it feels behind would have a vision of life complete would it not even though the vision were eeting About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the
