Creative Social Research Ananta Kumar Giri, 2005 The Creative Turn Anne M. Harris, 2014-04-16 The conundrum of understanding practising and teaching contemporary creativity is that it wants to be all things to all people Almost all modern lists of creativity creative thinking and how to becoming creative books begin with one premise the creative individual artist is not special rather each of us is creative in a special way and these skills can and must be nurtured Increasingly industry and education leaders are claiming that creativity is the core skill to take us into a prosperous future signalling the democratisation of creativity as industry Yet centuries of association between aesthetics mastery and creativity are hard to dismantle These days it is increasingly difficult to discuss creativity without reference to business industry and innovation Why do we love to think of creativity in this way and no longer as that rare visitation of the muse or the elite gift of the few This book looks at the possibility that creativity is taking a turn what that turn might be and how it relates to industry education and ultimately cultural role of creativity and aesthetics for the 21st century In proliferating discourses of the commodification of creativity there is one thing all the experts agree on creativity is undefinable possibly unteachable largely unassessable and becoming the most valuable commodity in 21st century markets

Beyond Sociology Ananta Kumar Giri, 2017-12-20 This book explores the contours of a transformational sociology which seeks to reconsider the horizons of sociological imagination It questions accepted modernist assumptions such as the equation of society and nation state the dualism of individual and society and that of ontology and epistemology Arguing that contemporary sociology suffers from

what Ulrich Beck calls the NATO-like fire power of western sociology it argues that sociology has to open itself to transcivilizational dialogues and planetary conversations about self culture and society The book also challenges scholars to go beyond a privileging of the post traditional telos of modernist sociology and puts forward a foundational interrogation of modernist sociology It underscores the limitations of established conventions of sociology and considering an alternative sociology based upon Confucian vision and practice of self transformation This collection offers a way to go beyond dominant structures of modern sociology and contemporary dominant ways of thinking about and doing sociology helping us cultivate a transdisciplinary sociology

Mead and Modernity Filipe Carreira da Silva, 2010-07-08 Filipe Carreira da Silva addresses the basic questions How should we read Mead and Why should we read Mead today by showing that the history of ideas and theory building are closely related endeavors Following a contextualist approach in exploring the meaning of Mead's writings Carreira da Silva reads the entire corpus of Mead's published and unpublished writings in light of the context in which they were originally produced from concrete events like the American involvement in World War I to more general debates like that of the nature of modernity Mead and Modernity attests to the relevance of Mead's ideas by assessing the relative merits of his responses to three fundamental modern problematics science selfhood and democratic politics The outcome is an innovative intellectual portrait of Mead as a seminal thinker whose contributions extend beyond his well known social theory of the self and include important insights into the philosophy of science and radical democratic theory **Artha Vijñāna**
