The Creative Spark Agustín Fuentes, 2017-03-21 A bold

new synthesis of paleontology archaeology genetics and anthropology that overturns misconceptions about race war and peace and human nature itself answering an age old question What made humans so exceptional among all the species on Earth Creativity It is the secret of what makes humans special hiding in plain sight Agust n Fuentes argues that your child s finger painting comes essentially from the same place as creativity in hunting and gathering millions of years ago and throughout history in making war and peace in intimate relationships in shaping the planet in our communities and in all of art religion and even science It requires imagination and collaboration Every poet has her muse every engineer an architect every politician a constituency The manner of the collaborations varies widely but successful collaboration is inseparable from imagination and it brought us everything from knives and hot meals to iPhones and interstellar spacecraft Weaving fascinating stories of our ancient ancestors creativity Fuentes finds the patterns that match modern behavior in humans and animals This key quality has propelled the evolutionary development of our bodies minds and cultures both for good and for bad It s not the drive to reproduce nor competition for mates or resources or power nor our propensity for caring for one another that have separated us out from all other creatures As Fuentes concludes to make something lasting and useful today you need to understand the nature of your collaboration with others what imagination can and can t accomplish and finally just how completely our creativity is responsible for the world we live in Agust n Fuentes s resounding multimillion year perspective will inspire readers and spark all kinds of creativity

past have proliferated Seeking to find common ground in an increasingly fractious and polarized discipline a group of archaeological theorists representing various schools of thought gathered in a roundtable during the fall of 1997 As organizer Michael Schiffer sought to build bridges that might begin to span the conceptual chasms that have formed in archaeology during the past few decades Many participants in the roundtable accepted the challenge of building bridges but some rejected the premise that bridge building is desirable or feasible Even so every chapter in the resulting volume contributes something provocative or significant to the enterprise of constructing social theory in archaeology and setting the agenda for future social theoretic research With contributions from every major school of thought whether informed by evolutionary theory feminism chaos theory behavioralism or post processualism this volume serves as both handbook to an array of theoretical approaches and as a useful look at each school s response to criticism

Visual Culture and Archaeology Robin Skeates,2005-12-21 This book draws on the complementary fields of visual cultural studies and interpretative archaeology to examine how successive generations transformed their visual culture to construct themselves It explores this process through an extended case study of art and social life in prehistoric south east Italy between the Upper Palaeolithic and the Bronze Age A central argument of the book is that a wide range of visually communicative artworks were consumed and produced in the cultural process Such objects range from portable artefacts to installations within sites to monumental structures in the landscape all of which were interwoven with people s bodies in the experiences of daily life and special performances More specifically it is argued that these powerful aesthetic objects were actively used by people across space and time to perceive the world around them and to reproduce their social lives They helped people to establish personal and collective boundaries identities and relationships
