Credit Risk Assessment Clark R. Abrahams, Mingyuan Zhang, 2009-04-27 Clark and Mingyuan start with an insightful and comprehensive description of how market participants contributed to the current crisis in the residential mortgage markets and the root causes of the crisis They then proceed to develop a new residential mortgage lending system that can fix our broken markets because it addresses the root causes The most impressive attributes of their new system is its commonsense return to the basics of traditional underwriting combined with factors based on expert judgment and statistics and forward looking attributes all of which can be updated as markets change The whole process is transparent to the borrower lender and investor Dean Schultz President and CEO Federal Home Loan Bank of San Francisco The credit market crisis of 2008 has deeply affected the economic lives of every American Yet its underlying causes and its surface features are so complex that many observers and even policymakers barely understand them This timely book will help guide nonspecialists through the workings of financial markets particularly how they value price and distribute risk Professor William Greene Stern School of Business New York University This book is a well timed departure from much of what is being written today regarding the current foreclosure and credit crisis Rather than attempting to blame lenders borrowers and or federal regulators for the mortgage meltdown and the subsequent impacts on the financial markets Clark and Mingyuan have proposed a groundbreaking new framework to revolutionize our current lending system The book is built on the authors deep understanding of risk and the models used for credit analysis and reflects their commitment to solve the problem What I find most profound is their passion to develop a system that will facilitate new and better investment especially in underserved urban markets that have been disproportionately impacted in the current crisis I applaud the authors for this important work and urge practitioners and theorists alike to investigate this new approach John Talmage President and CEO Social Compact In the wake of the credit crisis it is clear that transparency is the key to not repeating history In *Credit Risk Assessment The New Lending System for Borrowers Lenders and Investors*
