Creole Lexicon Architecture Landscape People:

A Creole Lexicon Jay Edwards, Nicolas Kariouk Pecquet du Bellay de Verton, 2004-09-01 Throughout Louisiana's colonial and postcolonial periods there evolved a highly specialized vocabulary for describing the region's buildings, people, and cultural landscapes. This creolized language, a unique combination of localisms and words borrowed from French, Spanish, English, Indian, and Caribbean sources, developed to suit the multiethnic needs of settlers, planters, explorers, builders, surveyors, and government officials. Today this historic vernacular is often opaque to historians, architects, attorneys, geographers, scholars, and the general public who need to understand its meanings. With *A Creole Lexicon*, Jay Edwards and Nicolas Kariouk provide a highly organized resource for its recovery. Here are definitions for thousands of previously lost or misapplied terms, including watercraft and land vehicles, furniture, house types, unique to Louisiana, people, and social categories. Drawn directly from travelers' accounts, historic maps, and legal documents, the volume's copious entries document what would actually have been heard and seen by the peoples of the Louisiana territory. Newly produced diagrams and drawings, as well as reproductions of original eighteenth and nineteenth-century documents and Historic American Buildings Surveys, enhance understanding. Sixteen subject indexes list equivalent English words for easy access to appropriate Creole translations. *A Creole Lexicon* is an invaluable resource for exploring and preserving Louisiana's cultural heritage. **The**

Archaeology of Vernacular Watercraft Amanda M. Evans, 2016-04-19 This volume presents multiple idiographic archaeological studies of vernacular watercraft from North America and the Caribbean. Rather than attempt to synthesize all vernacular types, this volume focuses on ship construction data recovered through archaeological investigations that has been used to make inferences about culture. This collection of case studies, including many examples from cultural resource management and graduate student theses, presents a thematic exploration of cultural adaptation as expressed through ship construction. New Orleans and the Design Moment Jacob Wagner, Michael Frisch, 2014-06-11 Following the disaster of

Hurricane Katrina in New Orleans, people began to discuss and visualize the ways in which the urban structure of the city could be reorganized. Rather than defining the disaster recovery process as simply a matter of rebuilding the existing city, these voices called for a more radical rethinking of the city's physical, social, and environmental systems. This idea of disaster as an opportunity for urban restructuring is a hallmark of a design moment. Design moments are different from the incremental process of urban growth and development. Instead of gradual growth and change, design moments present the opportunity for a significant restructuring of urban form that can shape the city for decades to come. As such, a design moment presents a critical juncture in the historical growth and development of a city. In this book, we explore the question: what does urban design have to do with a disaster like Hurricane Katrina? Focused on New Orleans, the authors explore different dimensions of the post-disaster design moment, including the politics of physical redevelopment, the city's history and identity, justice, and the image of the city, demolition and housing development, and the environmental aspects of the

recovery process This book was published as a special issue of the Journal of Urban Design *One Drop* Yaba Blay, 2021-02-16 Challenges narrow perceptions of Blackness as both an identity and lived reality to understand the diversity of what it means to be Black in the US and around the world What exactly is Blackness and what does it mean to be Black Is Blackness a matter of biology or consciousness Who determines who is Black and who is not Who's Black who's not and who cares In the United States a Black person has come to be defined as any person with any known Black ancestry Statutorily referred to as the rule of hypodescent this definition of Blackness is more popularly known as the one drop rule meaning that a person with any trace of Black ancestry however small or in visible cannot be considered White A method of social order that began almost immediately after the arrival of enslaved Africans in America by 1910 it was the law in almost all southern states At a time when the one drop rule functioned to protect and preserve White racial purity Blackness was both a matter of biology and the law One was either Black or White Period Has the social and political landscape changed one hundred years later One Drop explores the extent to which historical definitions of race continue to shape contemporary racial identities and lived experiences of racial difference Featuring the perspectives of 60 contributors representing 25 countries and combining candid narratives with striking portraiture this book provides living testimony to the diversity of Blackness Although contributors use varying terms to self identify they all see themselves as part of the larger racial cultural and social group generally referred to as Black They have all had their identity called into question simply because they do not fit neatly into the stereotypical Black box dark skin kinky hair broad nose full lips etc Most have been asked What are you or the more politically correct Where are you from throughout their lives It is through contributors lived experiences with and lived imaginings of Black identity that we can visualize multiple possibilities for Blackness *Vernacular Architecture Newsletter*, 2004 New Orleans in the Atlantic World William Boelhower, 2013-09-13 The thematic project New Orleans in the Atlantic World was planned immediately after hurricane Katrina and focuses on what meteorologists have always known the city's identity and destiny belong to the broader Caribbean and Atlantic worlds as perhaps no other American city does Balanced precariously between land and sea the city's geohistory has always interwoven diverse cultures languages peoples and economies Only with the rise of the new Atlantic Studies matrix however have scholars been able to fully appreciate this complex history from a multi disciplinary multilingual and multi scaled perspectivism In this book historians geographers anthropologists and cultural studies scholars bring to light the atlanticist vocation of New Orleans and in doing so they also help to define the new field of Atlantic Studies This book was published as a special issue of Atlantic Studies *Material Culture*, 2007 **To Be Free and French** Lorelle Semley, 2017-07-10 The Haitian Revolution may have galvanized subjects of French empire in the Americas and Africa struggling to define freedom and Frenchness for themselves but Lorelle Semley reveals that this event was just one moment in a longer struggle of women and men of color for rights under the French colonial regime Through political activism ranging from armed struggle to literary expression these colonial subjects
