Crimes And Punishment Volume #4 H.S. Stuttman,1994 Criminal Punishment and Restorative Justice David J. Cornwell,F. W. M. McElrea,John R. Blad,Robert B. Cormier,2006 Criminal Punishment and Restorative Justice is an appraisal of the divide that exists between punitive and restorative methods The book looks at events that serve to restrict a greater and more emphatic adoption of restorative justice and its huge potential in contemporary criminal justice developments In an era of increasing and worldwide reliance on imprisonment and other punitive methods the author argues that justice and communities would be far better served by a more enthusiastic and early shift to restorative methods Criminal Punishment and Restorative Justice provides an international perspective on how restorative justice can bring about an altogether more enlightened approach to dealing with offenders and victims alike against a backdrop of often spurious traditional justifications for punishment While acknowledging the need for a constructive use of custody and other corrections in response to serious crime the author points out that the present over reliance on custody can be reduced by challenging offenders to take responsibility for their offenses and to make practical reparation for their wrong doing and repairing the harm that they have caused The book also assesses the potential of restorative justice to make corrections more effective civilized humane and pragmatic in terms of finding solutions to crime on the basis of sound principles and information not political expediency The Encyclopedia of United States Supreme Court Reports Thomas Johnson Michie,Beirne Stedman,Charles W. Sublett,1910 *Foundational Texts in Modern Criminal Law* Markus D Dubber,2014-08-21 Foundational Texts in Modern Criminal Law presents essays in which scholars from various countries and legal systems engage critically with formative texts in criminal legal thought since Hobbes It examines the emergence of a transnational canon of criminal law by documenting its intellectual and disciplinary history and provides a snapshot of contemporary work on criminal law within that historical and comparative context Criminal law discourse has become and will continue to become more international and comparative and in this sense global the long standing parochialism of criminal law scholarship and doctrine is giving way to a broad exploration of the foundations of modern criminal law The present book advances this promising scholarly and doctrinal project by making available key texts including several not previously available in English translation from the common law and civil law traditions accompanied by contributions from leading representatives of both systems **Deterrence, Choice, and Crime, Volume 23** Daniel S. Nagin,Francis T. Cullen,Cheryl Lero Jonson,2018-04-17 Deterrence Choice and Crime explores the various dimensions of modern deterrence theory relevant research and practical applications Beginning with the classical roots of deterrence theory in Cesare Beccaria s profoundly important contributions to modern criminological thought the book draws out the many threads in contemporary criminology that are explicitly mentioned or at least hinted by Beccaria These include sanction risk perceptions and their behavioral consequences the deterrent efficacy of the certainty versus the severity of punishment the role of celerity of punishment in

the deterrence process informal versus formal deterrence and individual differences in deterrence The richness of the volume is seen in the inclusion of chapters that focus on the theoretical development of deterrence across disciplines such as criminology and economics In an innovative section the role of agents of deterrence is considered Lessons are learned from the practical applications of deterrence undertaken in the areas of policing corrections and the community The closing section includes Michael Tonry's An Honest Politician's Guide to Deterrence Certainty Severity Celerity and Parsimony a reminder of Beccaria's dictum that it is better to prevent crimes than punish them In the current environment deterrence arguments are routinely used to justify policies that do just the opposite Ray Paternoster who contributed two chapters passed away as this volume was being finalized Fittingly this book is dedicated to him and ends with Alex Piquero's poignant remembrance of Ray a path breaking deterrence scholar beloved mentor and ardent supporter of social justice Suitable for researchers and graduate students as well as for advanced courses in criminology this book breaks new ground in theorizing the effects of punishment and other sanctions on crime control
