Reparation for Victims of Crimes against Humanity Jo-Anne

Wemmers,2014-05-30 Each year countless people fall victim to crimes against humanity These include widespread occurrences of systematic murder torture rape disappearances forced deportation and political persecution Crimes against humanity constitute an attack on human dignity and as such they violate the human rights of the victim as well as the laws of humanity In recent years following the creation of the International Criminal Court there has been a growing interest in the prosecution of offenders and in particular in reparation following crimes against humanity While such measures are meant to provide justice for victims victims are often forgotten or lost in legal debates about what constitutes reparation and who is eligible to receive it This book reaches beyond the boundaries of law and psychology and takes a multidisciplinary approach to the question of reparation for victims of crimes against humanity Law does not take place in a vacuum and it is important to consider the impact of the law on the psychology of the victim as well as the legal principles themselves Herein lies the originality of this book which bridges the gaps between psychology victimology criminology and law and will be of key interest to academics and students engaged in the study of these areas *Evil as a Crime Against Humanity* Christof Royer,2020-08-29 This book seeks to reimagine why and how to confront mass atrocities in world politics Drawing on Hannah Arendt's conception of evil it interprets and understands mass atrocities as evil in an Arendtian sense that is as crimes against human plurality and thus crimes against humanity itself This understanding of mass atrocities paves the way for reframing responses to mass atrocities as attempts to confront evil In doing so the book focuses on military intervention under the banner of the Responsibility to Protect R2P and judicial intervention by the International Criminal Court ICC and reframes them as tools to protect human plurality from evil Furthermore the book looks at the place and the role of R2P and the ICC in the changing landscape of world order It argues that the protection of humanity from evil can serve as a legitimate Grundnorm basic norm around which a global constitutional order in an inherently pluralistic world can be constructed

'Crimes against Peace' and International Law Kirsten Sellars,2013-02-28 In 1946 the judges at the International Military Tribunal at Nuremberg declared crimes against peace the planning initiation or waging of aggressive wars to be the supreme international crime At the time the prosecuting powers heralded the charge as being a legal milestone but it later proved to be an anomaly arising from the unique circumstances of the post war period This study traces the idea of criminalising aggression from its origins after the First World War through its high water mark at the post war tribunals at Nuremberg and Tokyo to its abandonment during the Cold War Today a similar charge the crime of aggression is being mooted at the International Criminal Court so the ideas and debates that shaped the original charge of crimes against peace assume new significance and offer valuable insights to lawyers policy makers and scholars engaged in international law and international relations **Arguments and Speeches of William Maxwell Evarts** William Maxwell Evarts,1919
