EXCERPT The first wave is the decline of the American empire which is no longer omnipotent It represents a declining share of global GDP and will even be overtaken by China Europe and others even if it long remains the world's leading military power This decline will also correspond to a lack of the cutting edge collaborative technologies that lead to new discoveries in particular the information technologies biotechnologies and so on which will change a lot of things There will be changes in customs but these will probably contribute to the permanent triumph of the United States ideology as the dominant one in the world The second wave is produced by the US gradually sharing its dominance with other powers This process has already begun through the establishment of the G20 The joint government of the world is a response to the fragmentation that is taking place No doubt we shall see conflicts between China and Japan tension between Europe and the United States times when the whole lot will be at loggerheads We may well be experiencing the last period in history in which conflicts between great nations still take place
