[The Nature Study Movement](#) Kevin C. Armitage, 2009 The first comprehensive history of the nature study movement and its significance to American environmental thought and politics Argues that nature study advocates through their systematic program or educating children about nature formed a critical foundation for the launching of the conservation movement

Heritage, Values and Nature Conservation Alice Mercier, 2020-08-27 Seminar paper from the year 2010 in the subject Environmental Sciences grade 1 6 language English abstract This paper deals with the values perspectives and objectives in nature conservation and recreation In 1987 the Brundtland Commission published the ground breaking report titled Our common future The paradigm was shifted to sustainability confronting the humanity with its responsibility to establish a development that meets the needs of the present without compromising the ability of future generations to meet their own needs There is hardly any realm untouched by the notion of sustainable development be it of cultural environmental social or political nature Simplistically it can be stated that we aim at passing on our legacy with minimal losses This goal was not generated in 1987 but rather is an inherited desire to every human being There is consensus that cultural and biological diversity is a great part of this heritage and that globalization and consequent homogenization is jeopardizing it
