## **Conservation Science And Action:**

**Conservation Science and Action** William J. Sutherland, 2009-07-01 Conservation Science and Action is intended for upper level undergraduate and graduate courses in conservation biology This book reviews the latest thinking and approaches and in doing so provides a readily accessible reference work for conservation professionals and managers Because conservation biology is now one of the most dynamic disciplines in the life sciences William Sutherland and his international team of authors have selected many of the liveliest topics where key advances are currently being made They stress ideas point to unresolved issues and suggest possible future developments Finally since conservation is an applied subject the book's emphasis throughout is on action Essential reading for senior undergraduate and postgraduate students taking courses in conservation biology one of the most dynamic disciplines in the life sciences Contributions from leading figures in the field who have selected the liveliest topics where key advances are being made Reviews the latest thinking and approaches Contributors cover a range of taxonomic groups include aquatic and terrestrial plants and animals and give examples from around the world Emphasis given to action and all chapters have an applied component **Conservation Biology** Andrew S. Pullin, 2002-06-27 This colourful textbook introduces students to conservation biology the science of preserving biodiversity

**Conservation Science and Advocacy for a Planet in Peril** Dominick A. DellaSala, 2021-08-18 Conservation Science and Advocacy for a Planet in Peril Speaking Truth to Power helps equip scientists working on environmental and sustainability challenges with new tactics for success Global efforts and cooperation by member states of environmental conventions have steadily increased but lack efficient and scalable mechanisms of translating conservation science to policy The gap between science and policy is growing and very little time remains before the climate change and biodiversity losses trigger widespread disruptions of the planet's life support systems This book covers these important topics providing a must read for environmental and conservation scientists climate change activists students social scientists economic professionals sustainable businesses and policymakers Provides an unprecedented collection of local regional and national case studies from scientists and practitioners engaged in outreach to decision makers and the public Covers personal accounts that bring science into policymaking providing usable guidelines for those working to bridge this gap Includes the requisite information needed for effective communications and campaign strategies by sharing lessons learned **Effective**

**Conservation Science** Peter Kareiva, Michelle Marvier, Brian Silliman, 2017-10-06 This novel text assembles some of the most intriguing voices in modern conservation biology Collectively they highlight many of the most challenging questions being asked in conservation science today each of which will benefit from new experiments new data and new analyses The book's principal aim is to inspire readers to tackle these uncomfortable issues head on A second goal is to be reflective and consider how the field has reacted to challenges to orthodoxy and to what extent have or can these challenges advance conservation science Furthermore several chapters discuss how to guard against confirmation bias The overall goal is that

this book will lead to greater conservation of ecosystems and biodiversity by harnessing the engine of constructive scientific scepticism in service of better results      **Conservation Science: Balancing the Needs of People and Nature** Peter

Kareiva,Michelle Marvier,2024-07-25 Focused on protecting nature and the planet Conservation Science Balancing the Needs of People and Nature contains a heavy emphasis on highlighting strategies to better connect the practice of conservation with the needs and priorities of a growing human population to give you an overview of this important area of science      **Closing the Knowledge-Implementation Gap in Conservation Science** Catarina C. Ferreira,Cornelya F. C.

Klüttsch,2022-01-03 This book aims to synthesize the state of the art on biodiversity knowledge exchange practices to understand where and how improvements can be made to close the knowledge implementation gap in conservation science and advance this interdisciplinary topic Bringing together the most prominent scholars and practitioners in the field the book looks into the various sources used to produce biodiversity knowledge from natural and social sciences to Traditional Ecological Knowledge and Citizen Science as well as knowledge mobilization approaches to highlight the key ingredients that render successful conservation action at a global scale By doing so the book identified major current challenges and opportunities in the field for different sectors that generate mobilize and use biodiversity knowledge like academia boundary organizations practitioners and policy makers to further develop cross sectorial knowledge mobilization strategies and enhance evidence informed decision making processes globally      *Channel Islands National Marine Sanctuary, Management Plan* ,2008      *Taking Nature's Pulse* ,2009      *Conservation Research, Policy and Practice* William J. Sutherland,Peter N. M.

Brotherton,Zoe G. Davies,Nancy Ockendon,Nathalie Pettorelli,Juliet A. Vickery,2020-04-16 Conservation research is essential for advancing knowledge but to make an impact scientific evidence must influence conservation policies decision making and practice This raises a multitude of challenges How should evidence be collated and presented to policymakers to maximise its impact How can effective collaboration between conservation scientists and decision makers be established How can the resulting messages be communicated to bring about change Emerging from a successful international symposium organised by the British Ecological Society and the Cambridge Conservation Initiative this is the first book to practically address these questions across a wide range of conservation topics Well renowned experts guide readers through global case studies and their own experiences A must read for practitioners researchers graduate students and policymakers wishing to enhance the prospect of their work making a difference This title is also available as Open Access on Cambridge Core      *Cordell Bank*

*National Marine Sanctuary, Management Plan* ,2008      *Conservation, Science and Society* ,1984      **Plant Conservation Science and Practice** Stephen Blackmore,Sara Oldfield,2017-08-03 Only a green world rich in plants can sustain us and the millions of other species with which we share this planet But in an era of global change nature is on the retreat Like the communities they form many plant species are becoming rarer threatened even to the point of extinction The worldwide community of almost three thousand botanic gardens are holders of the most diverse living collections of plants and have the

unique potential to conserve plant diversity Conservation biology is a fast moving and often controversial field and as the contributions within these pages from experts in the field demonstrate plant conservation is multifaceted mirroring the complexity of the biodiversity it aims to protect and striving not just to protect threatened plants but to preserve ecosystem services and secure the integrity of the biosphere
