Conservation Medicine A. Alonso Aguirre, Richard S. Ostfeld, Gary M. Tabor, Carol House, Mary C. Pearl, 2002-09-26

Conservation medicine is an emerging discipline focussing on the intersection of ecosystem health animal health and human health Work in the biomedical and veterinary sciences is now being folded into conservation biology to explore the connections between animal and human health trace the environmental sources of pathogens and pollutants develop an understanding of the ecological causes of changes in human and animal health and understand the consequences of diseases to populations and ecological communities Conservation Medicine defines this new discipline It examines ecological health issues from various standpoints including the emergence and resurgence of infectious disease agents the increasing impacts of toxic chemicals and hazardous substances and the health implications of habitat fragmentation and degradation and loss of biodiversity It will provide a framework to examine the connections between the health of the planet and the health of all species and challenge practitioners and students in the health sciences and natural sciences to think about new collaborative ways to address ecological health concerns **Environmental Health Perspectives** ,2003-02 **New Directions in**

Conservation Medicine A. Alonso Aguirre, Richard Ostfeld, Peter Daszak, 2012-06-08 *New Directions of Conservation Medicine Applied Cases of Ecological Health* covers topics from emerging diseases and toxicants to the EcoHealth One Health explosion It challenges the notion that human health is an isolated concern removed from the bounds of ecology and species interactions *Annual Proceedings - American Association of Zoo Veterinarians* ,2003 *Foundations of Wildlife Diseases* Richard G. Botzler, Richard N. Brown, 2014-08-12 *Foundations of Wildlife Diseases* is a comprehensive overview of the basic principles that govern the study of wildlife diseases The authors integrate theoretical foundations with a thorough examination of the factors that can affect the health and fitness of animals They include specific information on a wide array of infectious agents such as bacteria viruses arthropods fungi protista and helminths as well as immunity to these agents Also provided is a foundation for the study of noninfectious diseases cancers and prion diseases that affect wildlife Supporting students faculty and researchers in areas related to wildlife management biology and veterinary sciences this volume fills an important gap in wildlife disease resources focusing on mammalian and avian wildlife while also considering reptiles and amphibians *Foundations of Wildlife Diseases* provides students with a structure for thinking about and understanding infective agents and their interactions with wildlife Each chapter includes an outline select definitions and concepts an overview and summary and literature cited *Zoo Veterinarians* Irus Braverman, 2020-10-20 Despite their centrality to the operation of contemporary accredited zoo and aquarium institutions the work of zoo veterinarians has rarely been the focus of a critical analysis in the social science and humanities Drawing on in depth interviews and observations of zoo and aquarium veterinarians mainly in Europe and North America this book highlights the recent transformation that has occurred in the zoo veterinarian profession during a time of ecological crisis and what these changes can teach us about our rapidly

changing planet Zoo vets Braverman instructs us with a wink have gone wild Originally an individual welfare centered profession these experts are increasingly concerned with the sustainability of wild animal populations and with ecological health The story of zoo vets going wild in their subjects of care their motivations and their ethical standards as well as in their professional practices and scientific techniques is also a story about zoo animals gone wild wild animals encroaching the zoo and more generally a wild world that is becoming zoo ified Such transformations have challenged existing veterinary standards and practices Exploring the regulatory landscape that governs the work of zoo and aquarium veterinarians Braverman traverses the gap between the hard and soft sciences and between humans and nonhumans At the intersection of animal studies socio legal studies and science and technology studies this book will appeal not only to those interested in zoos and in animal welfare but also to scholars in the posthumanities
