Constitutional Goods Alan Brudner, 2007-03-29 This book aims to distil the essentials of liberal constitutionalism from the jurisprudence and practice of contemporary liberal democratic states It presents a new picture of liberalism as reconciling a commitment to individual liberty and freedom of conscience with the perfectionist idea that the state ought to cultivate a type of personality whose fundamental ends are the goods essential to dignity Constitution and Membership Book of the Travelers' Goods and Leather Novelty Workers' International Union of America ... Judicial Control of Power Rainer Arnold, José Ignacio Martínez-Estay, 2017-05-16 Judicial control of public power ensures a guarantee of the rule of law This book addresses the scope and limits of judicial control at the national level i e the control of

public authorities and at the supranational level i.e. the control of States. It explores the risk of judicial review leading to judicial activism that can threaten the principle of the separation of powers or the legitimate exercise of state powers. It analyzes how national and supranational legal systems have embodied certain mechanisms such as the principles of reasonableness, proportionality, deference and margin of appreciation as well as the horizontal effects of human rights that help to determine how far a judge can go. Taking a theoretical and comparative view, the book first examines the conceptual bases of the various control systems and then studies the models, structural elements and functions of the control instruments in selected countries and regions. It uses country and regional reports as the basis for the comparison of the convergences and divergences of the implementation of control in certain countries of Europe, Latin America and Africa. The book's theoretical reflections and comparative investigations provide answers to important questions such as whether or not there are nascent universal principles concerning the control of public power, how strong the impact of particular legal traditions is and to what extent international law concepts have had harmonizing and strengthening effects on internal public power control.

The Reach of Free Movement Mads Andenas, Tarjei Bekkedal, Luca Pantaleo, 2017-09-26. The reach of free movement within the EU Internal Market and what constitutes a restriction are the topics of this book. For many years the tension between free movement and restrictions have been the subject of intense discussion and controversy and this includes the constitutional reach of the rights conferred by the Treaty of Lisbon. Anything that makes movement less attractive or more burdensome may constitute a restriction. Restrictions may be justified but only if proportionate. The reach of free movement is fundamental to the Internal Market both for the economic constitution and increasingly for individual rights in a European legal order that provides constitutional guarantees for rights exceeding those of free movement. The interaction between fundamental rights and fundamental freedoms to movement distinguishes the EU legal order from the national legal systems. The book falls into four parts: The Reach of Free Movement, Justifications and Proportionality, Fundamental Rights and Looking Abroad. The clear discussion of the fundamentals and dilemmas regarding the subject of this book should prove useful for academics, practitioners, graduate students as well as EU officials and judges wishing to stay updated on the ongoing scholarly debate regarding relevance to case law. Mads Andenas is Professor at the Department of Private Law, University of Oslo and at the Institute of Advanced Legal Studies, School of Advanced Studies, University of London. Tarjei Bekkedal is Professor at the Centre for European Law, University of Oslo and the Chair of the Norwegian Association for European Law. Luca Pantaleo is a Lecturer in EU law at The Hague University of Applied Sciences who obtained a PhD in International and EU Law in 2013 at the University of Macerata in Italy and who was previously a Senior Researcher at the T.M.C. Asser Institute and Postdoctoral researcher at the University of Luxembourg. Specific to this book: Up to date analysis of the reach of free movement within the EU Internal Market and what constitutes a restriction. Chapters by leading authorities and a number of young scholars active in various interconnected fields such as European law.

Constitutional law and Human Rights law international law global governance European trade and commercial law European Financial Services law and procedural law The strength of the content lies both in its highly practical and theoretical applicability **American Constitutional Law** John Innes Clark Hare,1889 *Constitutionalising Secession* David Haljan,2014-11-01 Constitutionalising Secession proceeds from the question What if anything does the law have to say about a secession crisis But rather than approaching secession through the optic of political or nationalist institutional accommodation this book focuses on the underpinnings to a constitutional order as a law making community underpinnings laid bare by secession pressures Relying on the corrosive effects of secession it explores the deep structure of a constitutional order and the motive forces creating and sustaining that order A core idea is that the normativity of law is best understood through a constitutional optic as an integrative associative force Constitutionalising Secession critically analyses conceptions of constitutional order implicit in the leading models of secession and takes as a leading case study the judicial and legislative response to secession in Canada The book therefore develops a concept of constitutionalism and law making associative constitutionalism to describe their deep structure as a continuing integrative process of association This model of a dynamic process of value formation can address both the association and the disassociation of constitutional systems
