N. Wright,1994 Innovative Project Management with FIDIC Contracts Adriana Spassova,2023-12-05 This book provides comprehensive guidance for the implementation of the legal requirements of FIDIC contracts with a detailed application of modern project management principles It demonstrates that the FIDIC suites for works and services contain many tools for good project management which can complement the innovation needed today to guide sustainable development The author s experience in construction management construction law and the application of FIDIC contracts as a FIDIC engineer a procurement claims consultant and a FIDIC accredited certified adjudicator and trainer underpins this unique and much needed book linking FIDIC contract management with project management practices and concepts It is structured around project management knowledge areas and details not only the FIDIC works contracts Red Yellow Silver 2017 Reprint 2022 Emerald 2019 Gold 2008 and Green Book 2021 but also the project management requirements of the contract between the Employer and Engineer White Book 2017 and the FIDIC supply chain contracts and explains how these all interface in project governance Linking the project management knowledge areas from the PMBOK and its Construction Extension with the FIDIC Body of Knowledge FBOK the book provides recommendations for integration of best practice and innovations It illustrates these processes with 54

flowcharts and 16 case studies as well as a railway scenario demonstrating the application of the book's recommended procedures. This will be an invaluable source of practical guidance for employers, contractors, and engineers responsible for procuring and managing construction projects. It provides useful insight for technical, legal, and financial experts on the management of processes, contracts, and digital tools with recommendations on how to tailor and use the FIDIC contracts for project success.

Construction Matters Stefan Holzer, Silke Langenberg, Clemens Knobling, Orkun Kasap, 2025-03-04

Construction History Construction Heritage Recent Construction Historiography Industrialization Engineering Sciences Building Materials Building Actors Construction History is still a fairly new and small but quickly evolving field. The current trends in Construction History are well reflected in the papers of the present conference. Construction History has strong roots in the historiography of the 19th century and the evolution of industrialization, but the focus of our research field has meanwhile shifted notably to include more recent and also more distant histories as well. This is reflected in these conference proceedings where 65 out of 148 contributed papers deal with the built heritage or building actors of the 20th or 21st century. The conference also mirrors the wide spectrum of documentary and analytical approaches comprised within the discipline of Construction History. Papers dealing with the technical and functional analysis of specific buildings or building types are complemented by other studies focusing on the lives and formation of building actors from laborers to architects and engineers from economical aspects to social and political implications on legal aspects and the strong ties between the history of construction and the history of engineering sciences. The conference integrates perfectly into the daily work at the Institute for Preservation and Construction History at ETH Zurich. Its two chairs, the Chair for Building Archaeology and Construction History and the Chair for Construction Heritage and Preservation, endeavor to cover the entire field and to bridge the gaps between the different approaches, methodologies, and disciplines between various centuries as well as technologies, learning together and from each other. The proceedings of 8ICCH give a representative picture of the state of the art in the field and will serve as a reference point for future studies.

Airline Operations and Management Gerald N. Cook, Bruce G. Bilig, 2023-05-04

Airline Operations and Management: A Management Textbook presents a survey of the airline industry with a strong managerial perspective. It integrates and applies the fundamentals of several management disciplines, particularly operations, marketing, economics, and finance, to develop a comprehensive overview. It also provides readers with a solid historical background and offers a global perspective of the industry with examples drawn from airlines around the world. Updates for the second edition include fresh data and examples, a range of international case studies exploring real-life applications, new or increased coverage of key topics such as the COVID-19 pandemic, state aid, and new business models. New chapters on fleet management and labor relations and HRM. Lecture slides for instructors. This textbook is for advanced undergraduate and graduate students of airline management, but it should also be useful to entry and junior-level airline managers and professionals seeking to expand their knowledge of the industry beyond their functional
