

# How to Solve Inequalities

## One-Step

### Example

$$x - 3 > 7$$

← Perform inverse operations to isolate the variable.

$$+3 \quad +3$$

$$x > 10$$

← Solved

### Example

$$3x + 8 < 26$$

← Step One: Subtract 8 from both sides

$$\frac{-8}{3} \quad \frac{-8}{3}$$

$$3x < 18$$

← Step Two: Divide both sides by 3

$$\frac{3x}{3} < \frac{18}{3}$$

$$x < 6$$

← Solved

## Two-Steps

### Example

$$4x + 1 \geq 17$$

← Step One: Swap Positions, < becomes >

$$-1 \quad -1$$

← Subtract 1 from both sides

$$4x \geq 16$$

← Divide both sides by 4

$$\frac{4x}{4} \geq \frac{16}{4}$$

$$x \geq 4$$

← Solved

### Example

$$-5y < 30$$

← Step One: Divide both sides by -5, < becomes >

$$\frac{-5y}{-5} > \frac{30}{-5}$$

$$y > -6$$

← Solved

## w/ Fractions

### Example

$$\frac{x}{3} - 6 < 2$$

← Step One: Add 6 to both sides

$$+6 \quad +6$$

$$3 \times \frac{x}{3} < 8 \times 3$$

← Step One: Multiply both sides by 3

$$x < 24$$

← Solved

### Example

Solve:  $\frac{x-7}{-3} \geq 4$

← Step One: Multiply both sides by -3, > becomes <

$$-3 \times \frac{x-7}{-3} \geq 4 \times -3$$

← Step Two: Invert and flip the inequality sign

$$x-7 \leq -12$$

← Add 7 to both sides

$$+7 \quad +7$$

$$x \leq -5$$

← Solved

*Philosophy and the City* Sharon M. Meagher, 2008-01-10 Using philosophical works from ancient Greece to contemporary times *Philosophy and the City* demonstrates both why philosophy matters to the city and how cities matter to philosophy The collection addresses questions that remain central to urban planning and everyday urban life such as What is a city What does it mean to be a good citizen By bringing various perspectives together Sharon M Meagher provides readers the opportunity to better understand key philosophical debates concerning not only social and political philosophy but also place and identity formation aesthetics philosophy of race and diversity and environmental philosophy **The SAGE Handbook**

**of Sociolinguistics** Ruth Wodak, Barbara Johnstone, Paul E Kerswill, 2011 This Handbook answers a long standing need for an up to date comprehensive international in depth critical survey of the history trajectory data results and key figures involved in sociolinguistics The result is a work of unprecedented coverage and insight It is all here from the foundational contributions to the field to the impact of new media new technologies of communication globalization trans border fluidities and agendas of research Model Building in Mathematical Programming H. Paul Williams, 2013-01-18 The 5th edition of

Model Building in Mathematical Programming discusses the general principles of model building in mathematical programming and demonstrates how they can be applied by using several simplified but practical problems from widely different contexts Suggested formulations and solutions are given together with some computational experience to give the reader a feel for the computational difficulty of solving that particular type of model Furthermore this book illustrates the scope and limitations of mathematical programming and shows how it can be applied to real situations By emphasizing the importance of the building and interpreting of models rather than the solution process the author attempts to fill a gap left by the many works which concentrate on the algorithmic side of the subject In this article H P Williams explains his original motivation and objectives in writing the book how it has been modified and updated over the years what is new in this edition and why it has maintained its relevance and popularity over the years <http://www.statisticsviews.com/details/feature/4566481> Model Building in Mathematical Programming published in fifth edition [htmlhttp://www.statisticsviews.com/details/feature/4566481](http://www.statisticsviews.com/details/feature/4566481) Model Building in Mathematical Programming published in fifth edition [html](http://www.statisticsviews.com/details/feature/4566481) a **Sprawl, Justice,**

environment Yet while he highlights the deleterious effects of sprawl on civic life in America he is also evenhanded He does not dismiss the pastoral homeownership ideal that is at the root of sprawl and is sympathetic to the vast numbers of Americans who very clearly prefer it Sprawl Justice and Citizenship is not only be the most comprehensive work in print on the subject it will be the first to offer an empirically rigorous critique of the most popular form of living in America today

Constructing Community Jeremy Levine,2021-06 A look at the benefits and consequences of the rise of community based organizations in urban development Who makes decisions that shape the housing policies and social programs in urban neighborhoods Who in other words governs Constructing Community offers a rich ethnographic portrait of the individuals who implement community development projects in the Fairmount Corridor one of Boston s poorest areas Jeremy Levine uncovers a network of nonprofits and philanthropic foundations making governance decisions alongside public officials a public private structure that has implications for democratic representation and neighborhood inequality Levine spent four years following key players in Boston s community development field While state senators and city councilors are often the public face of new projects and residents seem empowered through opportunities to participate in public meetings Levine found a shadow government of nonprofit leaders and philanthropic funders nonelected neighborhood representatives with their own particular objectives working behind the scenes Tying this system together were political performances of community government and nonprofit leaders all claiming to value the community Levine provocatively argues that there is no such thing as a singular community voice meaning any claim of community representation is by definition illusory He shows how community development is as much about constructing the idea of community as it is about the construction of physical buildings in poor neighborhoods Constructing Community demonstrates how the nonprofit sector has become integral to urban policymaking and the tensions and trade offs that emerge when private nonprofits take on the work of public service provision

The New Inequality Richard Freeman,1999-01-14 A wake up call on the new American inequality and what to do about it Harvard economist Richard B Freeman launches this provocative book with the idea that inequality is the one problem from which all crises in America flow He contends that inequality both economic and social has become more brutal and pervasive in the last twenty years

and that it is now time to stop analyzing its causes and consequences and concentrate on doing something about it Freeman offers real solutions raising the income of the working class reinvesting in cities and reenergizing democratic institutions through the encouragement of local citizen organizations His argument is answered by distinguished activists social scientists and activists James Tobin Heidi Hartmann Michael Piore Frances Fox Piven James Heckman Ernesto Cortes Jr and Paul R Krugman in essays that heed and add depth to Freeman's call As they debate the limits of traditional solutions for inequality all agree on one key prerequisite A democracy can solve inequality only by living up to its name Spirited and engaging this unique dialogue will serve as a guidebook for activists students and all interested in achieving a just society

NEW DEMOCRACY FORUM A series of short paperback originals exploring creative solutions to our most urgent national concerns The series editors for Boston Review Joshua Cohen and Joel Rogers aim to foster politically engaged intellectually honest and morally serious debate about fundamental issues both on and off the agenda of conventional politics

*Constructing and Contesting Structural Inequality* K. Sabeel Rahman, 2018 Many forms of economic social and political inequality are the product not of individual actors but rather of larger systemic and structural arrangements How should we conceptualize and then respond to such structural inequalities This paper highlights two areas of current debate in legal scholarship and public policy the changing nature of work and urban inequality Each of these areas of debate provides examples of how law and policy construct structural forms of inequality and how such inequality can be contested As this paper suggests structural inequality is best understood as an aggregate cumulative product of legal and policy decisions Such structural inequality requires similarly structural remedies that go beyond incremental meliorist approaches Specifically the paper suggests three strategies for redressing structural inequality limits on private power investments in public goods and oversight and enforcement by administrative agencies

*Constructing Inequality in Multilingual Classrooms* Luisa Martín Rojo, 2010-07-30 In her groundbreaking and innovative study the author takes us on a fascinating journey through some of Madrid's multilingual and multicultural schools and reveals the role played by linguistic practices in the construction of inequality through such processes as what she calls de-capitalization and ethnicization Through a critical sociolinguistic and discourse analysis of the data collected in an ethnographic study the book shows the exclusion caused by monolingualizing tendencies and ideologies of deficit in education and society The book opens a timely discussion of the management of diversity in multilingual and multicultural classrooms both for countries with a long tradition of migration flows and for those where the phenomenon is relatively new as is the case in Spain This study of linguistic practices in the classroom makes clear the need to rethink some key linguistic concepts such as practice competence discourse and language and to integrate different approaches in qualitative research The volume is essential reading for students and researchers working in sociolinguistics education and related areas as well as for all teachers and social workers who deal with the increasing heterogeneity of our late modern societies in their work

*The Social Construction of Difference and Inequality*

Tracy E. Ore, 2003 This anthology examines the social construction of race class gender and sexuality and the institutional bases for these relations While other texts discuss various forms of stratification and the impact of these on members of marginalized groups Ore provides a thorough discussion of how such systems of stratification are formed and perpetuated and how forms of stratification are interconnected The anthology supplies sufficient pedagogical tools to aid the student in understanding how the material relates to her his own life and how her his own attitudes actions and perspectives may serve to perpetuate a stratified system
