Constructing Nature Readings From The American Experience:

Constructing Nature Richard Jenseth, Edward E. Lotto, 1996 A reader on nature that presents substantial complex readings within the context of American culture Assignment sequences have been provided to help readers learn to write on a single subject from a variety of perspectives The reading selections are organized chronologically and focus exclusively on the concept of nature in America Readers thus can see how nature has been viewed historically from the time of the exploration of the new world to the present day A major section on the current environment movement allows readers to connect their work with what is happening in the world right now

Constructing Nature Richard Jenseth, Edward E. Lotto, 1996 **The Nature of Cities** Michael Bennett, David W. Teague, 2021-10-12 Cities are often thought to be separate from nature but recent trends in ecocriticism demand that we consider them as part of the total environment This new collection of essays sharpens the focus on the nature of cities by exploring the facets of an urban ecocriticism by reminding city dwellers of their place in ecosystems and by emphasizing the importance of this connection in understanding urban life and culture The editors both raised in small towns but now living in major urban areas are especially concerned with the sociopolitical construction of all environments both natural and manmade Following an opening interview with Andrew Ross exploring the general parameters of urban ecocriticism they present essays that explore urban nature writing city parks urban wilderness ecofeminism and the city and urban space The volume includes contributions on topics as wide ranging as the urban poetry of English writers from Donne to Gay the manufactured wildness of a gambling casino and the marketing of cosmetics to urban women by idealizing Third World naturalness These essays seek to reconceive nature and its cultural representations in ways that contribute to understanding the contemporary cityscape They explore the theoretical issues that arise when one attempts to adopt and adapt an environmental perspective for analyzing urban life The Nature of Cities offers the ecological component often missing from cultural analyses of the city and the urban perspective often lacking in environmental approaches to contemporary culture By bridging the historical gap between environmentalism cultural studies and urban experience the book makes a statement of lasting importance to the development of the ecocritical movement

Ecocomposition Christian R. Weisser, Sidney I. Dobrin, 2012-02-01 Ecocomposition examines current trends in universities toward more environmentally sound work explores the intersections between composition research that is discourse studies and ecostudies and offers possible pedagogies for the composition classroom Never before have the intersections between ecotheory and composition studies in theory and pedagogy been addressed in this much depth or detail As universities become increasingly concerned with issues of the environment within academic disciplines across the spectrum this book brings together a diverse group of prominent voices to discuss the development of ecocomposition and its possibilities and to argue for a greening of composition studies through which to engage the world in which we live *A History of Western American Literature* Susan Kollin, 2015-12-11 The American West is a complex region that has inspired generations of writers

and artists Often portrayed as a quintessential landscape that symbolizes promise and progress for a developing nation the American West is also a diverse space that has experienced conflicting and competing hopes and expectations While it is frequently imagined as a place enabling dreams of new beginnings for settler communities it is likewise home to long standing indigenous populations as well as many other ethnic and racial groups who have often produced different visions of the land This History encompasses the intricacy of Western American literature by exploring myriad genres and cultural movements from ecocriticism settler colonial studies and transnational theory to race ethnic gender and sexuality studies Written by a host of leading historians and literary critics this book offers readers insight into the West as a site that sustains canonical and emerging authors alike and as a region that exceeds national boundaries in addressing long standing global concerns and developments

The ISLE Reader Michael P. Branch, Scott Slovic, 2003 This volume gathers nineteen of the most representative and defining essays from the journal ISLE Interdisciplinary Studies in Literature and Environment over the course of its first ten years Following an introduction that traces the stages of ecocriticism's development The ISLE Reader is organized into three sections each of which reflects one of the general goals the journal has sought to accomplish The section titled Re evaluations provides new readings of familiar environmental writers and new environmental perspectives on authors or literary traditions not usually considered from a green perspective The writings in *Reaching Out to Other Disciplines* promote cross pollination among various disciplines and methodologies in the environmental arts and humanities The writings in the final section *New Theoretical and Practical Paradigms* are especially significant for the conceptual and methodological terrain they map The ISLE Reader documents the state of research in ecocriticism and related interdisciplinary fields provides a survey of the field and points to new methodologies and possibilities for the future

Relations, Locations, Positions Peter Vandenberg, Sue Hum, Jennifer Clary-Lemon, 2006 This anthology for beginning teachers and graduate students in composition studies and other related fields begins with the premise that writing is always social a dialogue between self and other This social turn not only underscores the value of the writing process by encouraging students to prewrite draft and revise together but more important it also focuses on postprocess by foregrounding approaches to teaching writing that highlight the importance of context Thus this anthology seeks to move beyond process by building on the valuable lessons from process pedagogy and by promoting the idea that writing stands for a radically complex network of phenomena From publisher s description Books in Print Supplement ,2002
