Constructive Real Numbers and Constructive Function Spaces Nikolai Aleksandrovich Shanin, 1968 This book is devoted to certain problems of constructive mathematical analysis I The basic sections are Chapters II and III which are devoted to the foundations of the theory of constructive function spaces Information from the theory of constructive real numbers needed in these chapters is presented in the first chapter The first chapter also contains other material in it the logicomathematical symbolism which we shall use is described and some problems of constructive mathematical logic are considered Constructive Real Numbers and Function Spaces Sanin. to give an idea of the kind of problems techniques and concepts involved in the area in question They also contain background and motivation rather than precise statements of precise theorems with detailed definitions and technical details on how to carry out proofs and constructions The second kind of article of medium length contains more detailed concrete problems results and techniques
