Emerging Trends and Issues in Management Consulting Anthony F. Buono, 2009-04-01 The ninth volume in the Research in Management Consulting RMC series much like the volumes that preceded it underscores that management consulting is a multifaceted field with a truly eclectic nature Management consultants range from sole practitioners and those working in small boutique firms to members of global consultancies that literally span the world Their interventions can consist of relatively simple commonly available services focused on mid to lower level organizational members to those that are far more esoteric in nature providing vital assistance and direction to key players at the upper echelons of the corporate hierarchy As consultants we can have individuals groups and work units or organizations as our client and engagements can be dominated by junior level specialists or guided by senior level gurus and advisors The volume contains 11 chapters that continue the RMC series commitment to enhancing our understanding of and insight into management consulting and the consulting process from a cross cultural global perspective The book is divided into three sections that explore emerging issues and challenges in the management consulting industry trends and techniques in management consulting interventions and reflections on consulting and the consulting process This volume which captures the dual nature possibilities and challenges associated with management consulting adds to the Janus faced portrayal of the field Drawing on the interplay between practice and scholarship the volume adds to the series goal of gaining a fuller understanding of management consulting theory in practice and practice in context in a quest for actionable knowledge about consultants consultancies and the consulting process **Demons in the Consulting Room** Adrienne Harris, Margery Kalb, Susan Klebanoff, 2016-08-05 *Demons in the Consulting Room* Echoes of Genocide Slavery and Extreme Trauma in Psychoanalytic Practice is the second of

two volumes addressing the overwhelming often unmetabolizable feelings related to mourning both on an individual and mass scale Authors in this volume explore the potency of ghosts ghostliness and the darker often grotesque aspects of these phenomena While ghosts can be spectral presences that we feel protective of demons haunt in a particularly virulent way distorting experience our sense of reality and our character Bringing together a collection of clinical and theoretical papers emons in the Consulting Room reveals how the most extreme types of trauma can continue to have effects across generations and how these effects manifest in the consulting room Essays in this volume consider traumas that have affected multiple generations of people such as the Holocaust experiences in the gulags and the experience of slavery Authors here consider the clinical challenges of working with the demonic force in severe childhood abuse and the effects of serious and prolonged physical injury and illness Inevitably there is in such difficult clinical work the combined effects of hauntings in the analysts and in patients and often in the surrounding culture In this book distinguished psychoanalysts explore the myriad forms of ghosts and the demonic which interfere and disrupt the endlessly difficult psychic work of mourning It will be of interest to psychotherapists and psychoanalysts as well as social workers family therapists psychologists and psychiatrists emons in the Consulting Room ill appeal to those specializing in bereavement and trauma and on a broader level to sociologists and historians interested in understanding means of coping with loss and grief on both an individual and larger scale basis
