Consumer Ethics in a Global Economy Daniel K. Finn, 2019-11-01 It is a serious mistake to think that all we need for a just world is properly structured organizations But it is equally wrong to believe that all we need are virtuous people Social structures alter people's decisions through the influence of the restrictions and opportunities they present Does buying a shirt at the local department store create for you some responsibility for the workplace welfare of the women who sewed it half a planet away Many people interested in justice have claimed so but without identifying any causal link between consumer and producer for the simple reason that no single consumer has any perceptible effect on any of those producers Finn uses a critical realist understanding of social structures to view both the positive and negative effects of the market as a social structure comprising a long chain of causal relations from consumer clerk to factory manager seamstress This causal connection creates a consequent moral responsibility for consumers and society for the destructive effects that markets help to create Clearly written and engaging this book is a must read for scholars involved with these moral issues

Consumer Protection in the Age of the 'Information Economy' Jane K. Winn, 2016-05-23 To date there have been few theoretical inquiries into the relationship between the technological innovation and basic objectives of consumer protection laws This book addresses this need by considering the impact of technological innovation on the foundations of consumer advocacy contracting behaviour control over intellectual capital and information privacy The collection presents a unique and timely perspective on these issues The authors internationally renowned experts from diverse areas such as consumer issues in technology markets contract and intellectual property provide a fresh perspective on these topics Contributions provide novel approaches to the question of what consumer protection might consist of in the context of technological innovation The book will be a valuable resource to academics and researchers in law and public policy and is easily accessible to graduate and undergraduate students working in these areas

Consumer

Credit and the American Economy Thomas A. Durkin, Gregory Elliehausen, Michael E. Staten, Todd J. Zywicki, 2014-07-16

Consumer Credit and the American Economy examines the economics behavioral science sociology history institutions law and regulation of consumer credit in the United States After discussing the origins and various kinds of consumer credit available in today s marketplace this book reviews at some length the long run growth of consumer credit to explore the widely held belief that somehow consumer credit has risen too fast for too long It then turns to demand and supply with chapters discussing neoclassical theories of demand new behavioral economics and evidence on production costs and why consumer credit might seem expensive compared to some other kinds of credit like government finance This discussion includes review of the economics of risk management and funding sources as well discussion of the economic theory of why some people might be limited in their credit search the phenomenon of credit rationing This examination includes review of issues of risk management through mathematical methods of borrower screening known as credit scoring and financial market sources of funding for offerings of consumer credit The book then discusses technological change in credit granting It examines how modern automated information systems called credit reporting agencies or more popularly credit bureaus reduce the costs of information acquisition and permit greater credit availability at less cost This discussion is followed by examination of the logical offspring of technology the ubiquitous credit card that permits consumers access to both payments and credit services worldwide virtually instantly After a chapter on institutions that have arisen to supply credit to individuals for whom mainstream credit is often unavailable including payday loans and other small dollar sources of loans discussion turns to legal structure and the regulation of consumer credit There are separate chapters on the theories behind the two main thrusts of federal regulation to this point fairness for all and financial disclosure Following these chapters there is another on state regulation that has long focused on marketplace access and pricing Before a final concluding chapter another chapter focuses on two noncredit marketplace products that are closely related to credit The first of them debt protection including credit insurance and other forms of credit protection is economically a complement The second product consumer leasing is a substitute for credit use in many situations especially involving acquisition of automobiles This chapter is followed by a full review of consumer bankruptcy what happens in the worst of cases when consumers find themselves unable to repay their loans Because of the importance of consumer credit in consumers financial affairs the intended audience includes anyone interested in these issues not only specialists who spend much of their time focused on them For this reason the authors have carefully avoided academic jargon and the mathematics that is the modern language of economics It also examines the psychological sociological historical and especially legal traditions that go into fully understanding what has led to the demand for consumer credit and to what the markets and institutions that provide these products have become today

The Political Economy of Consumer Behaviour Bruce Pietrykowski, 2009 Consumption forms a major part of people s lives As such geographers historians of technology and sociologists have devoted much

attention to trying to figure out what makes consumption meaningful. By contrast, economists have been content to hold onto theories of consumption that depend on a self-interested representative agent making utility-maximizing decisions. Pietrykowski develops this alternative account through the recovery of past attempts to forge a different analytical approach to the study of consumption. In particular, theories of consumption espoused by home economists, psychological economists, and Regulation school theorists are critically reviewed. These research projects, marginalized by the mainstream, are the precursors of contemporary scholarship in feminist behavioural and radical political economics. Reclaiming this work greatly enlarges the scope for contemporary research in consumer behavior. Pietrykowski then provides a richly textured set of case studies of green automobility, slow food, and alternative local currency in order to explore the diversity of user cultures and to highlight resistant forms of consumer practice. By carefully interweaving historical and interdisciplinary research, Pietrykowski creates a lively and incisive critique of mainstream economics. This monograph will be of interest to academic economists, sociologists, historians, and graduate students. In addition, the economics of consumption would also be of interest to readers in management, marketing, and schools of business administration.

Soul of the New Consumer David Lewis, Darren Bridger, 2011-09-09

The New Consumer's Revolution: Why buzz beats hype. Why cheap is chic. Why brands must be authentic. Why segmentation is dead. Why advertising must reinvent itself. Why New Consumers loathe doing the shopping. Why individuals' Tastespace will triumph in the marketplace. New Consumers are revolutionizing the world of business, our culture, and social expectations. No longer confined by gender, age, ethnicity, or income, they are breaking down barriers, shattering stereotypes, and redefining the very meaning of consumerism and the marketplace. From traditional to online retailing, from tracking coolhunters to exploring Tastespace, *The Soul of the New Consumer* unearths the very essence of New Consumer's behavior, their drive for authenticity, and goes far beyond the simple concepts of how we shop or what we buy to answer the most important question of all: why? Every facet of the new economy, from buzz marketing and new retailing technologies to internet shopping, has dramatically altered not only how we buy but what we buy and why. In an era of cheap is chic, wealthy shoppers haggle to win even the smallest discounts; gay consumers buy more rap and techno music than anyone else; and they are the fastest growing group of internet users. And the Web and the power of micro-marketing have revolutionized forever the means of wooing new customers. New Consumers are taking over the world and redefining the very meaning of consumerism and the marketplace. As likely to be affluent over fifties as ambitious under thirties, New Consumers defy traditional marketing concepts and segmentation by age, gender, or income. In pursuit of the authentic experience, New Consumers come together in their defining drive for all things real in everything from food to fashion, foreign holidays to furniture, technology to spirituality. Their attention and interest have shifted from commodity to authenticity. In an affluent world now saturated with affordable products, there are three new scarcities: time, attention, and trust. This major book shows how these can be won by giving the soul control rather than putting customers on the customer-is-king pedestal. Over

the past decade Lewis and Bridger have been at the forefront of researching the New Consumers studying their lifestyles observing behavior and watching the steady rise in their numbers influence and economic power Here for the first time and with example from Starbucks to Dyson they report the results of their work including Amex s use of computer technology to create intimate portraits of individuals what the author s call tastepace Regardless of product or service for companies large and small The Soul of the New Consumer gathers research from marketing psychology social trends and economics to present the first ever profile of the independent individualistic involved and well informed consumers who are challenging the way marketing selling and business are done

The Joyless Economy Tibor Scitovsky,1977 When this classic work was first published in 1976 its central tenet more is not necessarily better placed it in direct conflict with mainstream thought in economics Within a few years however this apparently paradoxical claim was gaining wide acceptance Scitovsky s ground breaking book was the first to apply theories of behaviorist psychology to questions of consumer behavior and to do so in accessible non technical language Setting out to analyze the failures of our consumerist lifestyle Scitovsky concluded that people s need for stimulation is so vital that it can lead to violence if not satisfied by novelty whether in challenging work art fashion gadgets late model cars or scandal Though much of the book stands as a record of American post war prosperity and its problems the revised edition also takes into account recent social and economic changes A new preface and a foreword by economist Robert Frank cover some of these issues Two revised chapters discuss the assimilation of counter cultural ideas throughout American society especially ideas concerning the quality of life Scitovsky draws fascinating connections between the new elite of college educated consumers and the emergence of a growing underclass plagued by drugs and violence perceptively tracing the reactions of these disparate groups to the problems of leisure and boredom In the wake of the the so called decade of greed and amidst calls for a kinder gentler society The Joyless Economy seems more timely than ever

The Common Sense of Political Economy, Including a Study of the Human Basis of Economic Law Philip Henry Wicksteed,1910

New Economy - New Competition D. Asch,B. Wolfe,2001-01-25 The new economy has given rise to new forms of competition This book provides a rich mix of theory evidence and management practice that will be invaluable to directors and managers who want to bring their companies closer to their customers The author considers competition the roles of consumers and legislative and regulatory authorities The book concludes by considering the impact of the revolution in information and communication technologies and shows how a number of key companies have adapted their strategies to meet the demands of their increasingly informed and empowered consumers
