Consuming Cities Urban Environment In Global Economy:

Consuming Cities Nicholas Low, 2000 This book is about cities as engines of consumption of the world's environment. It examines these issues through the impact of the Rio Declaration and assesses the extent to which it has made a difference.

Consuming Cities Ingemar Elander, Brendan Gleeson, Rolf Lidskog, Nicholas Low, 2005-08-12 This book is about cities as engines of consumption of the world's environment and the spread of policies to reduce their impact. It looks at these issues by examining the impact of the Rio Declaration and assesses the extent to which it has made a difference. *Consuming Cities* examines this impact using case studies from around the world including the USA, Japan, Germany, the UK, China, India, Sweden, Poland, Australia, and Indonesia. The contributors all have direct experience of the urban environment and urban policies in the countries on which they write and offer an authoritative commentary which brings the urban consumption dimension of sustainable development into focus. *Consuming Cities*, 1999 *Environmental Justice* Paul

Thompson, 2017-09-29 Environmental justice is one of the most controversial and important issues in contemporary social science. Volume 8 of the Energy and Environmental Policy series challenges our understanding of environmental justice in a global context. It includes theoretical investigations and case studies by leading authors in the field. Global forces of technology and the development of global markets are transforming social life and the natural order. These changes require a critical examination of nature-society relations. Increasingly, modernization assigns the risks of modernity to those with the least power and greatest vulnerability to environmental harm. Conventional environmentalism, which focuses on critique of the effects of humanity against nature, is inadequate to the challenges of globalization. In particular, it fails to explain sources of persistent patterns of social injustice that accompany escalating environmental exploitation. As the capacity for environmental destruction expands, broader concerns about environmental injustice have come to the fore, including awareness of threats to whole cultures, ways of life, and entire ecologies. The volume's authors consider the links between expanded patterns of environmental injustice and the structures and forces underlying and shaping the international political economy. Environmental injustice is examined across a variety of cultures in the developed and developing world. Through case studies of climate, colonialism, revolutionary ecology, and environmental commodification, the global and local dimensions of the problem are presented. The latest volume in this important series demonstrates that environmental justice cannot be reduced to simple parables of indifference, prejudice, or appropriation. It forges understanding of environmental injustice as a development of international political economy itself. Likewise, initiatives on behalf of environmental justice are seen as elements of broader movements to secure self-determination in a globalizing world. This book will be of interest to policymakers, energy and environmental experts, and all those interested in the environment and environmental law. It provides new perspectives on the place of environmental justice in international political and economic conflict. **Urban**

Regeneration in the UK Andrew Tallon, 2009-08-21 Exploring the streets of London, Manchester, Belfast, Edinburgh, or

Cardiff one cannot help but notice the striking transformations taking place in the urban landscapes This prominent regeneration of urban areas in the UK and around the world has become an increasingly important issue amongst governments and populations The growing concern has been a result of the impacts of the decline of cities since the collapse of manufacturing industries and the heightening of global competition A range of innovative approaches to tackle urban problems have been taken over many decades to attempt to regenerate the fortunes of towns and cities across the UK This text provides an accessible yet critical synthesis of urban regeneration in the UK incorporating key policies approaches issues and debates The central objective of the book is to place the historical and contemporary regeneration agenda into context Section one sets up the conceptual and policy framework for urban regeneration in the UK Section Two traces policies that have been adopted by central government to influence the social economic and physical development of cities including early municipal interventions in the late nineteenth century community focused urban policies of the late 1960s entrepreneurial property led regeneration of the 1980s and competition for urban funds in the 1990s The penultimate section illustrates the key thematic policies and strategies that have been pursued by cities themselves focusing particularly on improving economic competitiveness and tackling social disadvantage These approaches are contextualized by discussions covering for example urban competitiveness policies and the focus on sustainable urban regeneration The final section summarizes key issues and debates facing urban regeneration and speculates upon future directions Urban Regeneration in the UK blends the approaches taken by central government programmes and cities themselves in the regeneration process The latest ideas and examples from across disciplines and across the UK's urban areas are illustrated This book provides a comprehensive and up to date synthesis that will fill a significant gap in the current literature on regeneration and will be a tool for students as well as a seminal read for practitioners and researchers
