*Party Leaders and their Selection Rules in Western Europe* Bruno Marino, 2021-09-23 This book analyses the determinants behind the openings in party leader selection rules leaders selectorate in 10 Western European countries and more than 55 parties between the mid 1980s and the mid 2010s Presenting a novel and revealing theoretical and empirical framework it tackles the impact of party change and the personalisation of politics specifically using data coming from the first expert survey on the personalisation of politics in Western Europe the PoPES A quantitative analysis is paired with more in depth explorations of two Italian parties the Italian Communist Party Democratic Party of the Left the Northern League and the missed opening of their leader selectorate This book highlights the critical importance of studying party leader selection rules against the backdrop of allegedly declining parties and rising party leaders and concludes by placing its findings in a broader discussion about the future of Western European party leaders This book will be of key interest to scholars and students of political parties and party systems leadership political elites elections democracy and more widely of Western European politics and comparative politics

*Connectedness and Contagion* Hal S. Scott, 2022-11-01 An argument that contagion is the most significant risk facing the financial system and that Dodd Frank has reduced the government's ability to respond effectively The Dodd Frank Act of 2010 was intended to reform financial policies in order to prevent another massive crisis such as the financial meltdown of 2008 Dodd Frank is largely premised on the diagnosis that connectedness was the major problem in that crisis that is that financial institutions were overexposed to one another resulting in a possible chain reaction of failures In this book Hal Scott argues that it is not connectedness but contagion that is the most significant element of systemic risk facing the financial system Contagion is an indiscriminate run by short term creditors of financial institutions that can render otherwise solvent institutions insolvent It poses a serious risk because as Scott explains our financial system still depends on approximately 7.4 to 8.2 trillion of runnable and uninsured short term liabilities 60 percent of which are held by nonbanks Scott argues that efforts by the Federal Reserve the FDIC and the Treasury to stop the contagion that exploded after the bankruptcy of Lehman Brothers lessened the economic damage And yet Congress spurred by the public's aversion to bailouts has dramatically weakened the power of the government to respond to contagion including limitations on the Fed's powers as a lender of last resort Offering uniquely detailed forensic analyses of the Lehman Brothers and AIG failures and suggesting alternative regulatory approaches Scott makes the case that we need to restore and strengthen our weapons for fighting contagion
