

# Cost Containment Concept in Behavioral Economics

✓ Exclusively available on IvyPanda

## Introduction

Behavioral economics seeks to change the insurance system, considering people's reactions to changes in certain areas. The goals set, reflecting the interests of the state and society, are to maintain the volume and quality of funded medical care against cost containment. It is a permanent conflict between improving quality and reducing costs. The way out lies in a compromise solution for society and the state, in search of the optimal ratio of efficiency and cost of treatment, in the rational use of resources. Thus, there is one primary task - to achieve a reduction in healthcare costs through the analysis of the behavior of citizens.

## Discussion

The goal of state regulation in medical and social security is twofold and, in turn, reflects public interests - high-quality medical care for the population and administrative-economic spending of always scarce funds. The main strategic task of regulation in the field of medical providers is curbing the growth of healthcare costs (Stadhouders et al., 2019). Such a strategic task can be solved through several tactical installations:

- the desire not to pay for expensive methods and means.
- pay only for selected methods and means, that is, the formation of restrictive lists.
- pay for methods and means, but at favorable prices, for which price regulation is applied and reference prices are set.
- pay for treatment not in total but only in part.
- limit the number of people a state has to pay, creating a system of preferential categories of citizens.

*The Long Telegram 2.0* Peter Eltsov, 2019-11-19 The Long Telegram 2.0 A Neo Kennanite Approach to Russia lays out an original argument for understanding Russia that goes deep into its history starting with the tri partite dictum orthodoxy autocracy nationality formulated in 1833 by count Sergey Uvarov The author explores Uvarov s triad in the context of modern Russia adding five more traits exceptionalism expansionism historical primordialism worship of the military and glorification of suffering The author argues that as presently constituted Russia cannot become a democracy and sooner than later it will disintegrate replicating the fate of the Soviet Union The key reasons for these according to the author are weak mechanisms for the transition of power poorly developed institutions of the state feeble economy and education frail ideology and most importantly the lack of a unified national identity Following this assessment the author defines a strategy for dealing with Russia based on a combination of offensive realism and realpolitik recommending that the West copes with Russia in a more pragmatic manner The book includes the author s translation of a unique historical document from the 1860s a pamphlet calling for the independence of Siberia on the example of the American revolution *History of the 4th Marine Division, 1943-2000*, 2000 *History of the 4th Marine Division, 1943-1996*, 1997 **George Kennan and the**
