Conservation Research, Policy and Practice William J. Sutherland, Peter N. M. Brotherton, Zoe G. Davies, Nancy Ockendon, Nathalie Pettorelli, Juliet A. Vickery, 2020-04-16 Conservation research is essential for advancing knowledge but to make an impact scientific evidence must influence conservation policies decision making and practice This raises a multitude of challenges How should evidence be collated and presented to policymakers to maximise its impact How can effective collaboration between conservation scientists and decision makers be established How can the resulting messages be communicated to bring about change Emerging from a successful international symposium organised by the British Ecological Society and the Cambridge Conservation Initiative this is the first book to practically address these questions across a wide range of conservation topics Well renowned experts guide readers through global case studies and their own experiences A must read for practitioners researchers graduate students and policymakers wishing to enhance the prospect of their work making a difference This title is also available as Open Access on Cambridge Core Conservation Science in the U.K. Norman Tennant, 1993 **Conservation Science in the U.K.** Norman H.
