Speculations T. E Hulme,2011-11-30 The history of the philosophers we know but who will write the history of the philosophic amateurs and readers Who will tell us of the circulation of Descartes who read the book and who understood it Or do philosophers like the mythical people on the island take in each other's washing Are they the only readers of each other's books For I take it a man who understands philosophy is inevitably irritated into writing it The few who have learnt the jargon must repay themselves by employing it A new philosophy is not like a new religion a thing to be merely thankful for and accepted mutely by the faithful It is more of the nature of food thrown to the lions the pleasure lies in the fact that it

can be devoured It is food for the critics and all readers of philosophy I suppose are critics and not faithful ones waiting for the new gospel *The Psychology of a Musical Prodigy* Géza Révész,1925 **Weighty Issues** Jeffery Sobal,2017-09-08

Many people consider their weight to be a personal problem when then does body weight become a social problem Until recently the major public concern was whether enough food was consistently available As food systems began to provide ample and stable amounts of food questions about food availability were replaced with concerns about ideal weights and appearance These interests were aggregated into public concerns about defining people as too fat and too thin Social constructionist perspectives can contribute to the understanding of weight problems because they focus attention on how these problems are created maintained and promoted within various social environments While there is much objectivist research concerning weight problems few studies address the socially constructed aspects of fatness and thinness This book however draws from and contributes to social constructionist perspectives The chapters in this volume offer several perspectives that can be used to understand the way society deals with fatness and thinness The contributors consider historical foundations medical models gendered dimensions institutional components and collective perspectives These different perspectives illustrate the multifaceted nature of obesity and eating disorders providing examples of how a variety of social groups construct weight as a social problem **Industrial and Labor Problems ...** Russell Sage Foundation. Intertwined Lives Lois W. Banner,2010-12-15 A uniquely revealing biography of two eminent twentieth century American women Close friends for much of their lives Ruth Benedict and Margaret Mead met at Barnard College in 1922 when Mead was a student Benedict a teacher They became sexual partners though both married and pioneered in the then male dominated discipline of anthropology They championed racial and sexual equality and cultural relativity despite the generally racist xenophobic and homophobic tenor of their era Mead s best selling *Coming of Age in Samoa* 1928 and *Sex and Temperament in Three Primitive Societies* 1935 and Benedict s *Patterns of Culture* 1934 *Race* 1940 and *The Chrysanthemum and the Sword* 1946 were landmark studies that ensured the lasting prominence and influence of their authors in the field of anthropology and beyond With unprecedented access to the complete archives of the two women including hundreds of letters opened to scholars in 2001 Lois Banner examines the impact of their difficult childhoods and the relationship between them in the context of their circle of family friends husbands lovers and colleagues as well as the calamitous events of their time She shows how Benedict inadvertently exposed Mead to charges of professional incompetence discloses the serious errors New Zealand anthropologist Derek Freeman made in his famed attack on Mead s research on Samoa and reveals what happened in New Guinea when Mead and colleagues engaged in a ritual aimed at overturning all gender and sexual boundaries In this illuminating and innovative work Banner has given us the most detailed balanced and informative portrait of Mead and Benedict individually and together that we have had From the Hardcover edition **Political Pluralism** Gongquan Xiao,1927 *Colour-blindness* Mary Collins,1925 **A Psychology of Gesture**

Charlotte Wolff, 2015-08-11 Originally published in 1945 this title was a follow up to the author's previous book *The Human Hand*. This time she looks at the psychology of gesture and its relation to personality. The special place that a psychology of gesture merits is obvious. It permits a direct knowledge of personality without any effort or misleading co-operation on the part of the subject since it can be applied without his being aware of the fact. The book is constructed on a system of clinical studies and medico-psychological interpretations. The author felt that this title must be regarded as a complementary study to her main studies.
