Literacy Matters Robert Yagelski,2000 Literacy can empower students but it may also limit their understanding if taught without regard for the context of their lives Using his encounters with students in high school college and state prison classrooms as well as his own experience Robert Yagelski looks at the sometimes ambiguous role of literacy in our lives and examines the mismatch between conventional approaches to teaching literacy and the literacy needs of students in a rapidly changing increasingly technological world He asserts that ultimately the most important job of the English teacher is to reveal to students ways they can participate in the discourse that shapes their lives and he offers a timely look at how technology has influenced the way we write and read The scope of this fascinating book reaches beyond the classroom and offers insight about what it means to be literate in an economically driven dynamic society Addressing earlier works on the subject of literacy as well as the ideas of theorists such as Foucault this perceptive work has much to offer educators and anyone seeking to understand the nature of literacy itself

Reading-to-Write Linda Flower, Victoria Stein, John Ackerman, Margaret J. Kantz, Kathleen McCormick, Wayne C. Peck, 1990-09-20. The Social and Cognitive Studies in Writing and Literacy Series is devoted to books that bridge research theory and practice exploring social and cognitive processes in writing and expanding our knowledge of literacy as an active constructive process as students move from high school to college. This descriptive study of reading to write examines a critical point in every college student's academic performance when he or she is faced with the task of reading a source integrating personal ideas and creating an individual text with a self-defined purpose. Offering an unusually comprehensive view of this process, the authors chart a group of freshmen as they study and write in their dormitories recording their think-aloud strategies for reading, writing, and revising their interpretation of the task and their broader social, cultural, and contextual understanding of college writing. Flower, Stein, and colleagues convincingly conclude that the legacy of schooling in general makes the transition to college difficult and more important than the assumptions students hold and the strategies they use in undertaking this task play a significant role in their academic performance. Embracing a broad range of perspectives from rhetoric, composition, literacy research, literary and cultural theory, and cognitive psychology, this rigorous analysis treats reading to write as both a cognitive and social process. It will interest researchers and theoreticians in rhetoric and writing, teachers working with students in transition from high school to college, and educators involved in the links between cognition and the social process.

Developing College Reading Jacobus, 1994-12-01. *The Literacy Workshop* Maria P. Walther, Karen Biggs-Tucker, 2020. This book offers a unique interpretation of traditional workshop instruction by showing teachers how to integrate their separate reading and writing workshops into one literacy workshop periodically and as dictated by student needs that takes advantage of the inherent reciprocity between reading and writing. Through narrative discussion, student samples, photographs, instructional resources, online content, suggested lessons, and various mentor texts, the book explains the structure of the literacy workshop, tells readers how to get started with it, and shows them how to decide when it's best to merge the two workshops into one. The book is divided into two parts. Part I, Chapters 1-4, lays the foundation and gives the nuts and bolts of literacy workshop. Part II, Chapters 5-9, includes engagement strategy, topic-focused demonstration lessons, which includes a primary and an intermediate level example lesson for each Big Idea.
