## **Construction Technology Volume I:**

**Construction Technology** R. Chudley, 1987 The four volumes of Construction Technology provide a comprehensive guide to building technology from simple domestic single storey construction using traditional techniques to more complex multi storey construction using more modern industrialised techniques Each volume describes the technology concisely and is well illustrated with the author's own illustrations The series provides a basic knowledge of all building activities from basic methods of construction in the early volumes through to more complex topics such as site planning curtain walling and builders plant in later volumes The series concentrates on the technology and avoids lengthy descriptive passages leaving the description to the author's very detailed drawings Volume 1 along with volume 2 covers conventional or traditional methods and materials of construction It introduces the student to the techniques used in building a small structure such as a bungalow or two storey house The book covers the basic parts of a building such as the substructure e.g. site works and setting out and foundations the superstructure e.g. walls flooring and roofs simple finishes and fittings e.g. partitions and painting and decorating and the basic aspects of water supply and drainage

**Construction Technology 2: Industrial and Commercial Building** Mike Riley, Alison Cotgrave, 2018-02-20 Designed in a structured directed format to help develop understanding rather than just providing a simple source of information this popular undergraduate textbook offers comprehensive coverage of industrial and commercial building technology It builds on material in the first volume in the series Construction Technology 1 House Construction but it is also valuable as a standalone text The most student friendly textbook in the area it uses a wealth of features to reinforce understanding and test knowledge including case studies and comparative studies Case studies include photographs and commentary on specific aspects of the technology of framed buildings while comparative studies allow the reader to make a critical evaluation comparing and contrasting design details and solutions This textbook is aimed at undergraduates in Construction Management Quantity Surveying and Building Surveying and HNC/D students in the same areas It is also ideal for associated Built Environment courses e.g. Land Management Civil Engineering where the basic technologies need to be understood New to this Edition Thoroughly revised throughout New material on sustainable construction incorporated as a key theme in each aspect of technology A new chapter on building services installations A new section of the highly topical subject of Building Information Modelling BIM Accompanying online resources for this title can be found at [bloomsburyonlineresources.com/construction-technology-2-3e](http://bloomsburyonlineresources.com/construction-technology-2-3e) These resources are designed to support teaching and learning when using this textbook and are available at no extra cost
