Constructive Continuity:

Life in the Universe Joseph Seckbach, Julian Chela-Flores, Tobias Owen, FRANCOIS Raulin, 2005-03-21 H
BALTSCHIEFFSKY Chairman Department of Biochemistry and Biophysics Arrhenius Laboratories Stockholm University S 106
91 Stockholm Sweden Professor Stanley Miller Professor K R Srinivasan Organizers and Sponsors of this Conference Ladies
and Gentlemen We are getting ready for the Abdus Salam Lecture honoring two most distinguished scientists Both have very significantly contributed to the rapid growth of the sphere of fundamental knowledge in the second half of the twentieth century Abdus Salam
theoretical physicist Nobel Prize winner creator and long time leader of The Abdus Salam Center of Theoretical Physics With his
active interest in the origin of life he played a leading role in instigating these conferences on Chemical Evolution and
the Origin of Life here in Trieste which still are of such primary importance in this field He left this world in 1996 And Stanley Miller
whom most generously as the Abdus Salam Lecturer is going to
give us his Recollection of the beginning of chemical evolution experiments Dear Stanley it is a great privilege
and indeed a pleasure to introduce you This is in a way a quite easy task because we all already know that the Miller experiment which is
most appropriately placed in the title of this conference in 1953 exactly 50 years ago was a major breakthrough
opening up a new research field with and for rational and advanced chemical experimentation on the molecular origin of life
It would take too much time to try to describe here your scientific career your prices
your Presidency of ISSOL and your many other successes So I rather will end this introduction with a couple of personal recollections First
I would like to combine something of Abdus Salam and Stanley Miller Abdus Salam gave the very
first invited lecture of the University of Stockholm International Lectures on Human Global and Universal Problems in 1975
And 10 years later at Lidingö close to Stockholm Stanley Miller gave the opening lecture of a conference on the Molecular Evolution of Life
On a picture I took as a co-arranger of these events Stanley is seen approaching in his usual modest way more focussed on scientific
discussion than on the camera Last but not least I shall tell you the true story about when we learned that Stanley
is an enthusiastic environmentalist in the best sense of the word About 25 years ago in Stockholm Stanley my wife and I strolled in
the King's Garden Its elm trees were full 7 J Seckbach et al eds Life in the Universe 7 8 C 2004 Kluwer Academic Publishers
Printed in the Netherlands 8 of young people who some even spending nights in the trees prevented the authorities from
removing the elm trees by ax and saw Also Stanley signed a petition to save the elm trees and they were saved Stanley I believe
that your greatness as a scientist and as a friend must be linked to the many facets of your wonderful personality We much
look forward to your lecture THE BEGINNING OF CHEMICAL EVOLUTION EXPERIMENTS Recollections and Perspectives 1

etc. Methods and Their Applications** Olga Kosheleva, Sergey P. Shary, Gang Xiang, Roman Zapatin, 2020-02-28 Data
processing has become essential to modern civilization The original data for this processing comes from measurements or

from experts and both sources are subject to uncertainty Traditionally probabilistic methods have been used to process uncertainty However in many practical situations we do not know the corresponding probabilities in measurements we often only know the upper bound on the measurement errors this is known as interval uncertainty In turn expert estimates often include imprecise fuzzy words from natural language such as small this is known as fuzzy uncertainty In this book leading specialists on interval fuzzy probabilistic uncertainty and their combination describe state of the art developments in their research areas Accordingly the book offers a valuable guide for researchers and practitioners interested in data processing under uncertainty and an introduction to the latest trends and techniques in this area suitable for graduate students

Mandelkern,1983 There are two long outstanding constructivity problems concerning real valued functions on the closed unit interval i is every function continuous ii is every continuous function uniformly continuous In this paper the method of reliefs is introduced to aid the study of these problems While so far leading to no definitive solutions the method has yielded a few partial results and might be used as a basis for further investigations Computer Science Logic Peter Clote,European

Probability Olivier Darrigol,2018-02-09 One of the pillars of modern science statistical mechanics owes much to one man the Austrian physicist Ludwig Boltzmann 1844 1906 As a result of his unusual working and writing styles his enormous contribution remains little read and poorly understood The purpose of this book is to make the Boltzmann corpus more accessible to physicists philosophers and historians and so give it new life The means are introductory biographical and historical materials detailed and lucid summaries of every relevant publication and a final chapter of critical synthesis Special attention is given to Boltzmann s theoretical tool box and to his patient construction of lofty formal systems even before their full conceptual import could be known This constructive tendency largely accounts for his lengthy style for the abundance of new constructions for the relative vagueness of their object and for the puzzlement of commentators This book will help the reader cross the stylistic barrier and see how ingeniously Boltzmann combined atoms mechanics and probability to invent new bridges between the micro and macro worlds **Computer Science Logic** Peter G.
