A Cross-Border-Only Regulation for Consumer Transactions in the EU Christian Twigg-Flesner, 2011-11-16 For almost three decades the European Union EU has adopted measures to regulate consumer transactions within the internal market created by the EU Treaties Existing legislation is largely based on directives harmonizing aspects of national consumer laws This Brief argues that a more appropriate approach for EU consumer law would be legislation in the form of a regulation which is applicable to cross border transactions only The author considers the constitutional constraints of the EU Treaties before examining the case for a cross border only measure He argues that the cross border approach is preferable because it would provide clearer benefits for consumers seeking to buy goods and services across borders while not upsetting domestic law unnecessarily in particular in the context of e commerce with implications for industry policymaking and regional development The Brief concludes by suggesting that a successful EU measure on cross border consumer transactions could create a template for global initiatives for transnational consumer law

The Involvement of EU Law in Private Law Relationships Dorota Leczykiewicz, Stephen Weatherill, 2013-03-12 The involvement of the EU in regulating private conduct and relationships between individuals is increasing As a result EU law affects the scope of private autonomy in ever wider contexts sparking tensions with fundamental concepts of national private law systems This volume offers a descriptive and normative account of the involvement of EU law in private law relationships The recurring theme in the collected papers is the scope of policy objectives which are apt to legitimise the European Union's as yet unsystematic tendency to serve as a source of restrictions of private autonomy The nature and purpose of the involvement of European Union law in private law relationships is investigated by the authors from both the substantive and the constitutional perspective The papers look at such sectors regulating private law relationships as consumer law labour law competition law equal treatment law and the law of remedies While focusing on private law relationships the authors investigate more general concepts of EU law such as the Internal Market freedoms and general principles of law and the different modes of ensuring the effective application of EU secondary law
