Contact Languages A Wider Perspective Creole Language Library V 17:

Language Contact and Change in the Americas Andrea L. Berez-Kroeker, Diane M. Hintz, Carmen Jany, 2016-04-19

This unique collection of articles in honor of Marianne Mithun represents the very latest in research on language contact and language change in the Indigenous languages of the Americas. The book aims to provide new theoretical and empirical insights into how and why languages change especially with regard to contact phenomena in languages of North America, Meso America and South America. The individual chapters cover a broad range of topics including sound change, morphosyntactic change, lexical semantics, grammaticalization, language endangerment and discourse pragmatic change. With chapters from distinguished scholars and talented newcomers alike, this book will be welcomed by anyone with an interest in internally and externally motivated language change.

The Languages and Linguistics of Africa Tom

Güldemann, 2018-09-10. This innovative handbook takes a fresh look at the currently underestimated linguistic diversity of Africa, the continent with the largest number of languages in the world. It covers the major domains of linguistics, offering both a representative picture of Africa's linguistic landscape as well as new and at times unconventional perspectives. The focus is not so much on exhaustiveness as on the fruitful relationship between African and general linguistics and the contributions the two domains can make to each other. This volume is thus intended for readers with a specific interest in African languages and also for students and scholars within the greater discipline of linguistics.

Ibero-Asian Creoles

Hugo C. Cardoso, Alan N. Baxter, Mário Pinharanda Nunes, 2012. Starting in 1498, contact between Ibero-Romance and Asian languages has taken place along a vast stretch of the coastlines of continental and insular Asia, producing a string of contact varieties which are among the least visible in the field of Creole Studies. This volume, the first one dedicated to the Portuguese and Spanish lexified creoles of Asia, brings together comparative studies on various issues across the Ibero-Asian creoles and beyond, by specialists in these languages. This type of cross-linguistic analysis allows progress on many fronts, including the reconstruction of past stages of the languages, the explanation of observed similarities and differences, the identification and consolidation of typological taxonomic clusters, or the assessment of the linguistic effects of different contact equations. The volume provides a timely window onto aspects of current research on the Ibero-Asian creoles, including unsettled debates and ways in which their study can contribute to advance several areas of linguistic enquiry.

Language and Slavery Jacques Arends, 2017-07-26. This posthumous work by Jacques Arends offers new insights into the emergence of the creole languages of Suriname, including Sranantongo or Suriname Plantation Creole, Ndyuka and Saramaccan, and the sociohistorical context in which they developed. Drawing on a wealth of sources, including little-known historical texts, the author points out the relevance of European settlements prior to colonization by the English in 1651 and concludes that the formation of the Surinamese creoles goes back further than generally assumed. He provides an all-encompassing sociolinguistic overview of the colony up to the mid-19th century and shows how ethnicity, language, attitude, religion, and

location had an effect on which languages were spoken by whom The author discusses creole data gleaned from the earliest sources and interprets the attested variation The book is completed by annotated textual data both oral and written and representing different genres and stages of the Surinamese creoles It will be of interest to linguists historians

Vigouroux, 2021-10-15 Variation Rolls the Dice A worldwide collage in honour of Salikoko S Mufwene aims to celebrate Mufwene's ground breaking contribution to linguistics in the past four decades The title also encapsulates his approach to language as both systemic and socio cultural practices and the role of variation in determining particular evolutionary trajectories in specific linguistic ecologies The book therefore focuses on variation within and across languages within and across speakers and how this fundamental aspect of human behavior can affect language structure in time and space Mufwene has been instrumental in putting creole languages on the map of General Linguistics and connecting their analysis to issues of language acquisition multilingualism language contact language evolution and language typology Thanks to the diversity of topics and the wide ranging theoretical persuasions of the contributors this volume aims at a large readership including both scholars and advanced students interested in cutting edge research in the aforementioned domains *Creole*

Discourse Susanne Mühleisen, 2002-11-18 Creole languages are characteristically associated with a negative image How has this prestige been formed And is it as static as the diglossic situation in many anglo creolophone societies seems to suggest This volume examines socio historical and epistemological factors in the prestige formation of Caribbean English Lexicon Creoles and subjects their classification as a socio linguistic type to scrutiny and critical debate In its analysis of rich empirical data this study also demonstrates that the uses functions and negotiations of Creole within particular social and linguistic practices have shifted considerably Rather than limiting its scope to one national speech community the discussion focusses on changes of the social meaning of Creole in various discursive fields such as inter generational changes of Creole use in the London Diaspora diachronic changes of Creole representation in written texts and diachronic changes of Creole representation in translation The study employs a discourse analytical approach drawing on linguistic models as well as Foucauldian theory **The Making of a Mixed Language** Maarten Mous, 2003-01-01 The Mbugu or Ma language Tanzania

is one of the few genuine mixed languages reputedly combining Bantu grammar with Cushitic vocabulary In fact the people speak two languages one mixed and one closely related to the Bantu language Pare This book is the first comprehensive description of these languages It shows that these two languages share one grammar while their lexicon is parallel In the distant past the people shifted from a Cushitic to a Bantu language and in the process rebuilt a language of their own that expresses their separate ethnic identity in a Bantu environment This linguistic history is explained in the context of the intricate history of the people The discussion of the processes that were involved in the formation of Ma a Mbugu is extremely relevant for both creole studies and for contact linguistics in general **Paradigm Change** Martine

Robbeets, Walter Bisang, 2014-10-15 This book is concerned with comparing morphological paradigms between languages in order to establish areal and genealogical relationships The languages in focus are the Transeurasian languages Japanese Korean Tungusic Mongolic and Turkic languages World eminent experts in diachronic morphology and typology interact with specialists on Transeurasian languages presenting innovative theoretical analyses and new empirical facts The stress on the importance of paradigmatic morphology in historical linguistics contrasts sharply with the paucity of existing literature on the topic This volume partially fills this gap by shifting focus from Indo European to other language families Paradigm change will appeal to scholars and advanced students concerned with linguistic reconstruction language contact morphology and typology and to anyone interested in the Transeurasian languages **Linguistic Interference and Native Language**
