The Encyclopedia of Housing, Second Edition Andrew T. Carswell,2012-05-31 Since publication of the groundbreaking Encyclopedia of Housing in 1998 many issues have assumed special prominence within this field and

indeed within the global economy For instance the global economic meltdown was spurred in large part by the worst subprime mortgage crisis we ve seen in our history On a more positive note the sustainability movement and green development has picked up considerable steam and given the priorities and initiatives of the current U S administration this will only grow in importance and increased attention has been given in recent years to the topic of indoor air quality Within the past decade as well the Baby Boom Generation began its march into retirement and senior citizenship which will have increasingly broad implications for retirement communities and housing assisted living facilities aging in place livable communities universal design and the like Finally within the last twelve years an emerging generation of young scholars has been making significant contributions to the field For all these reasons and more we are pleased to present a significantly updated and expanded Second Edition of the Encyclopedia of Housing *Handbook of Social Impact Assessment and Management* Frank Vanclay, Ana Maria Esteves, 2024-03-14 This is an open access title available under the terms of a CC BY NC ND 4.0 License It is free to read download and share on Elgaronline.com This carefully conceived Handbook presents a state of the art discussion of the field of social impact assessment SIA highlighting contemporary understandings and emerging issues in this continually evolving area of research and practice Experienced SIA practitioners from around the world share their learnings and advice on a comprehensive range of issues faced in social performance practice

Environmental Dilemmas Robert Mugerauer, Lynne Manzo, 2008 Because many people and ecosystems share or

constitute any given place they all have a stake in the outcome of what any of us do in regard to environmental problems It is not surprising that issues are hotly contested given the many divergent interests needs and preferences of a community's members much less those of people downstream who are affected by the consequences of our actions or of outside parties who play a part including those who would speak on behalf of the ecosystems Thus we not only must make careful individual decisions concerning the environment but need to improve the way we operate socially especially given the roles and responsibilities we have as environmental professionals private sector developers public policy makers and staff or engaged citizens To aid in resolving our environmental dilemmas Mugerauer and Manzo focus on the decision making process Their goal is to help readers become more aware of the worldviews beliefs and values that enter into the decisions they make and to better resolve differences with others To guide readers in thinking about their own positions and how to approach ethical decisions Mugerauer and Manzo employ a number of exercises and cases to investigate the choices and issues that different stakeholders face for example concerning sustainability Additionally the book presents alternatives in terms of formalized ethical principles the major ethical theories and professional codes of ethics

the impacts of oil companies broken promises when the Exxon Valdez spills most of its cargo and despoils thousands of miles of shore Ott illustrates in stirring fashion the oil industry s 20 year trail of pollution and deception that predated the tragic 1989 spill and delves deep into the disruption to the fishing community of Cordova over the following 19 years In vivid detail she describes the human trauma coupled inextricably with that of the sound s wildlife and its long road to recovery Ott critically examines shifts in scientific understanding of oil spill effects on ecosystems and communities exposes fundamental flaws in governance and the legal system and contrasts hard won spill prevention and spill response measures in the sound to dangerous conditions on the Alaska pipeline Her human story varied background professional training and activist heart lead readers to the root of the problem a clash of human rights and corporate power embedded in law and small town life Not One Drop is as much an example of how too many corporate owners and political leaders betray everyday citizens as it is one of the universal struggle to maintain heart to find the courage to overcome disaster and to forge a new path from despair to hope Law of Toxic Torts Michael Dore,1987 **Risk** ,1995 Natural Hazards Observer ,1988 EDRA; Proceedings of the Annual Environmental Design Research Association Conference Environmental Design Research Association,2004
