**Mapping Paradigms in Modern and Contemporary Art** Simonetta Moro, 2021-07-29 Mapping Paradigms in Modern and Contemporary Art defines a new cartographic aesthetic or what Simonetta Moro calls carto aesthetics as a key to interpreting specific phenomena in modern and contemporary art through the concept of poetic cartography The problem of mapping although indebted to the spatial turn of poststructuralist philosophy is reconstructed as hermeneutics while exposing the nexus between topology space time and memory The book posits that the emergence of mapping as a ubiquitous theme in contemporary art can be attributed to the power of the cartographic model to constitute multiple worldviews that can be seen as paradigmatic of the post modern and contemporary condition This book will be of particular interest to scholars in art history art theory aesthetics and cartography

*New Collecting: Exhibiting and Audiences after New Media Art* Beryl Graham, 2016-04-29 The collections of museums galleries and online art organisations are increasingly broadening to include more new media art Because new

media is used as a means of documenting archiving and distributing art and because new media art might be interactive with its audiences this highlights the new kinds of relationships that might occur between audiences as viewers participants selectors taggers or taxonomisers New media art presents many challenges to the curator and collector but there is very little published analytical material available to help meet those challenges This book fills that gap Drawing from the editor's extensive research and the authors expertise in the field the book provides clear navigation through a disparate arena The authors offer examples from a wide geographical reach including the UK North America and Asia and integrate the consideration of audience response into all aspects of their work The book will be essential reading for those studying or practicing in new media curating or museums and galleries
