**E-marketing** Judy Strauss, Raymond Frost, 2009. The 5th edition of *E Marketing* treats the subject as traditional marketing with a twist: the Internet and other technologies have had a profound effect on the way we do business. This transformation has resulted in new business techniques that add customer value, build customer relationships, and increase company profitability. Stressing product, pricing, distribution, and promotion, the authors use a strategic perspective and give many important practices not covered in previous editions, namely blogs, social networking, online branding, and search marketing. Point of purchase, scanning devices, databases, and other offline technologies are discussed. For anyone interested in learning more about electronic marketing, this is an excellent handbook; its comprehensive glossary makes this a must-have reference.

Library Issues, 2007      The Deal, 2006      The Public Manager, 2009      *Alphabet to Internet* Irving E. Fang, 2008. *Alphabet to Internet: Mediated Communication in Our Lives* is a survey history of our media of communication; it considers how all of us are affected by the means we have devised for recording and communicating information. From the start of writing things down, mediated communication has nudged our world onward, again and again. It has changed the way we choose to live. Beginning with the evolution of writing and the alphabet from Sumer to Greece, *Alphabet to Internet* traces, in a brisk and lively style, the development and the impact of printing, still and motion photography, mail service, the telegraph, the telephone, recording, broadcasting, the Internet, and the digital revolution. An additional chapter reflects on the role of communication in current international political struggles. Another chapter is devoted to the cultural influence of video games. A supplementary section, *A Timeline of Communication and Culture*, contains more than 5,000 entries. It is the most complete and up-to-date of its subject matter in existence.
