

# Steps to implement your hybrid work schedule

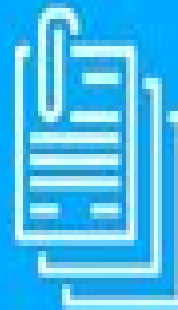

## Step 1

Choose a model that meets your needs as an organization. To get started, the cohort schedule is the easiest.

## Step 2

Introduce a one-day WFH policy to start small. To experiment, pick a department or group of people.

## Step 3

Keep track of how and where you work. Create a set of guidelines for how your company organizes work.

## Step 4

Choose the tools you'll use to manage a hybrid work schedule and make sure everyone is on the same page with their KPIs and objectives.

**Hustle Urbanism** Tatiana Thieme, 2025-03-25 Exploring hustle as a social, cultural, and economic phenomenon in contemporary Nairobi. In Nairobi's underserved neighborhoods, hustle has emerged as both a vital survival strategy and a way of life for youth. Exploring the multiple meanings and manifestations of the hustle economy across different scenarios of provisioning, distribution, exchange, learning, and mobilizing, *Hustle Urbanism* draws on more than a decade of ethnographic engagement to center the logics, perspectives, and inventive strategies of a group of youth who constantly navigate job scarcity, inadequate basic services, and climate-induced harms. Tatiana Thieme shows how young people develop tools of resistance against the legacies of colonial violence and uneven urban development while carving out spaces of opportunity for themselves and their peers. The stories she includes bring thick ethnographic detail and longitudinal perspective to the lives and livelihoods of youth whose diverse skill sets and knowledges span from circular economies and eco activism to hip hop and local leadership. Filling a significant gap in both existing scholarship and popular discussion, *Hustle Urbanism* offers critical theorization of precarious urban environments and the affirmative modes of making life work in the city against the odds. While Thieme cautions against fetishizing hustle as a form of social and economic uplift, she calls for a greater recognition of the ingenuity and skill involved in hustle urbanism, arguing that studying hustle narratives and practices opens up timely empirical and theoretical questions about overlapping urban struggles and possibilities that coexist in the everyday city. **Learning for Uncertainty** G. Williamson McDiarmid, Yong Zhao, 2022-01-31 *Learning for Uncertainty* explores technology's role in education, specifically unpacking the question: How should educators prepare today's children for a world that has yet to be made? As technology evolves faster than our capacity to fully understand the social, cultural, economic, and moral implications of many innovations, today's educators are tasked with the unique role of preparing students to capitalize on technology's opportunities and also mitigate its dangers to their society, to democratic processes, and to institutions. Veteran educators McDiarmid and Zhao explore the implications of emerging technologies for future jobs, organizations, students, and learning, covering topics such as: The future of work and workers as technology eliminates some industries while creating new ones; Potential futures, both bright and dark, awaiting

students The qualities dispositions social behaviors and skills that are likely to advantage students in the future The possibility of technology to revolutionize education in ways that will better position students for an uncertain future How technology can free teachers from time and effort devoted to routine matters to instead assuming roles that are potentially more satisfying and supportive of their students learning Learning opportunities and educator roles that have the potential to bring about needed changes Capitalizing on these uncertain times to rethink curriculum pedagogy opportunities to learn and the organization of school as well as the roles of students educators parents and policymakers This latest book in the Routledge Leading Change series is ideal reading for educators and policymakers in both P 12 and higher education interested in ensuring our education systems provide the experiences and learning opportunities necessary to cultivate the innovative iconoclastic and generative thinkers and creators needed for a future that nourishes the minds bodies and spirits of all
