Glenn Cohen, Daniel B. Kramer, Julia Adler-Milstein, Carmel Shachar, 2024-04-30 Health care delivery is shifting away from the clinic and into the home Even prior to the COVID 19 pandemic the use of telehealth wearable sensors ambient surveillance and other products was on the rise In the coming years patients will increasingly interact with digital products at every stage of their care such as using wearable sensors to monitor changes in temperature or blood pressure conducting self directed testing before virtually meeting with a physician for a diagnosis and using smart pills to document their adherence to prescribed treatments This volume reflects on the explosion of at home digital health care and explores the ethical legal regulatory and reimbursement impacts of this shift away from the 20th century focus on clinics and hospitals towards a more modern health care model This title is also available as Open Access on Cambridge Core *Artificial Intelligence for Multimedia Information Processing* Xavier Savarimuthu, Sivakannan Subramani, Alex Noel Joseph Raj, 2024-06-14 Advances in artificial intelligence AI widespread mobile devices internet technologies multimedia data sources and information processing have led to the emergence of multimedia processing Multimedia processing is the application of signal processing tools to multimedia data text audio images and video to allow the interpretation of these data particularly in urban and smart city environments This book discusses the new standards of multimedia and information processing from several technological perspectives including analytics empowered by AI streaming on the intelligent edge multimedia edge caching and AI services for edge AI and hardware and devices for multimedia on edge intelligence FEATURES Covers a wide spectrum of enabling technologies for AI and machine learning for multimedia and information processing Includes many applications using AI from robotics and driverless cars to environmental human health and remote sensing Presents an overview of the fundamentals of AI and multimedia processing imaging signal and speech Explains new models and architectures for multimedia streaming services and caching for AI Discusses the emerging paradigms of the deployment of hardware and devices for multimedia on edge intelligence Gives recommendations for future research in multimedia and AI This book is written for engineers and graduate

students in image and signal processing information processing environmental engineering medical and public health etc who are interested in machine learning deep learning and multimedia processing

Ethics of Data and Analytics Kirsten Martin, 2022-05-12 The ethics of data and analytics in many ways is no different than any endeavor to find the right answer When a business chooses a supplier funds a new product or hires an employee managers are making decisions with moral implications The decisions in business like all decisions have a moral component in that people can benefit or be harmed rules are followed or broken people are treated fairly or not and rights are enabled or diminished However data analytics introduces wrinkles or moral hurdles in how to think about ethics Questions of accountability privacy surveillance bias and power stretch standard tools to examine whether a decision is good ethical or just Dealing with these questions requires different frameworks to understand what is wrong and what could be better Ethics of Data and Analytics Concepts and Cases does not search for a new different answer or to ban all technology in favor of human decision making The text takes a more skeptical ironic approach to current answers and concepts while identifying and having solidarity with others Applying this to the endeavor to understand the ethics of data and analytics the text emphasizes finding multiple ethical approaches as ways to engage with current problems to find better solutions rather than prioritizing one set of concepts or theories The book works through cases to understand those marginalized by data analytics programs as well as those empowered by them Three themes run throughout the book First data analytics programs are value laden in that technologies create moral consequences reinforce or undercut ethical principles and enable or diminish rights and dignity This places an additional focus on the role of developers in their incorporation of values in the design of data analytics programs Second design is critical In the majority of the cases examined the purpose is to improve the design and development of data analytics programs Third data analytics artificial intelligence and machine learning are about power The discussion of power who has it who gets to keep it and who is marginalized weaves throughout the chapters theories and cases In discussing ethical frameworks the text focuses on critical theories that question power structures and default assumptions and seek to emancipate the marginalized
