The Hitchhiker's Guide to AI Arthur Goldstuck,2025-08-01 Arthur Goldstuck is a veteran of understanding how new technologies interact with all parts of society This book provides an informative and accessible look at what AI might have in store for us DR BENJAMIN ROSMAN Professor of AI and Robotics University of the Witwatersrand The Hitchhiker's Guide to AI is a thoughtful book that takes a close look at one of the most significant developments of the year with specific reference to Africa and developing economies It is food for thought written with a light touch while raising many of the most salient questions SANDRA LAURENCE TechCentral The Hitchhiker's Guide to AI is one of the most interesting and easy to follow books of its kind CHRIS GIBBONS Acumen Explore the ever evolving world of AI with ease discovering its practical applications and the magic it's creating REHANA RUTTI Womans World Did you know that AI helped South Africa to win the 2023 Rugby World Cup That Africa led the way in small language models That AI has been supporting farmers in Kenya for the last decade The Hitchhiker's Guide to AI The African Edge reframes the conversation about AI through the lens of human roles and merges global advances with distinctly African realities From farmers using AI to track bee movements to school pupils guided by WhatsApp tutors to musicians experimenting with machine made beats this book explores how everyday people across the African continent are shaping and being shaped by the rise of machine intelligence Rather than obsessing over distant futures or Silicon Valley breakthroughs this book brings AI down to earth Through the eyes of local and international teachers coders executives and artists it tells the story of Africa's AI moment not as a catch up game but as reframing the global narrative Insightful grounded and provocative it's a guide to navigating the most transformative technology of our age with feet firmly planted on African soil and eyes wide open to the global context

The Radical Case for Teaching Skim Reading in First-Year Writing Ellen C. Carillo,2025-10-15 The Radical Case for Teaching Skim Reading in First Year Writing encourages faculty particularly in writing studies to check internal biases toward deep reading and teach skim reading in first year writing courses Written by Ellen C Carillo who has previously published on the importance of teaching deep reading this small book is a controversial prompt for further discussion and exploration Data from studies of the lived experiences of undergraduates indicate that students do not need deep reading practices in the majority of their classes across the disciplines and moreover that students succeed in their classes by skim reading Rather than imagining an idealized set of circumstances that allow for sustained deep reading as does a great deal of the scholarship on reading in writing studies The Radical Case for Teaching Skim Reading in First Year Writing argues for teaching students reading practices that will support their success in their college writing assignments rather than those strategies the field believes should support their success In our information landscape and our fragile democracy encouraging skimming as opposed to deep reading may seem like a gamble this very tendency toward the quick rather than the critical has undoubtedly contributed to the current crisis of mass misinformation However teaching students to use skim reading as a

strategic tool for purposeful engagement and efficient yet thoughtful information filtering better equips them to navigate the rapidly changing information landscape and manage the fast paced flow of content from diverse media sources Practical Ideas for Teaching Writing as a Process Carol B. Olson,1996-02 Contains a collection of specific classroom strategies suggestions for teaching writing to elementary school students according to an eight stage process Specific techniques for teaching each stage of the writing process descriptions of proven approaches for using these techniques are also included A wonderful resource a labor of love from a large talented group of educators Had its beginnings in the California Writing Project at the Univ of California Irvine Best Seller Illustrated Design Recommendations for Intelligent Tutoring Systems: Volume 11 - Professional Career Education Anne Sinatra,Art Graesser,Xiangen Hu,Lisa Townsend,Vasile Rus,2023-09-01 The Design Recommendations for Intelligent Tutoring Systems series has covered many different topics over the past ten years Those topics have ranged from general components of intelligent tutoring systems ITSs Learner Modeling Instructional Management Authoring Tools Domain Modeling to advanced elements Assessment Methods Team Tutoring Self Improving Systems Data Visualization Competency Based Scenario Design Our most recent previous volume included a series of Strengths Weaknesses Opportunities and Threats SWOT Analyses on all the initial topics as well as overviews of ITSs in general and the Generalized Intelligent Framework for Tutoring GIFT software Sottolare et al 2012 Sottolare et al 2017 Goldberg Sinatra 2023 Each book in the Design Recommendations for Intelligent Tutoring Systems series has been associated with an Expert Workshop on the same topic These workshops are part of a cooperative agreement W911NF18 2 0039 between US Army Combat Capabilities Development Command DEVCOM Soldier Center and University of Memphis One of the goals of the expert workshops is to learn more about ITS capabilities that are being developed and how these approaches as well as lessons learned could enhance the GIFT software GIFT is freely available at <https://www.GIFTtutoring.org> Invited experts in industry academia and government discuss the expert workshop topic their applicable work and suggestions for improving GIFT in what is usually a two day event Both the University of Memphis and GIFT Teams participate in the workshop help to guide discussion and ask questions that will provide insight into current challenges in GIFT The expert workshop associated with this current book was held virtually in October 2022 and included presentations about both general approaches and specific applications to professional education in ITSs Additionally the University of Memphis team that participated in the workshop included Arthur C Graesser Xiangen Hu Vasile Rus and Jody Cockroft The US Army DEVCOM Soldier Center team who participated in the workshop included Benjamin Goldberg Gregory Goodwin Anne M Sinatra Randall Spain and Lisa N Townsend The current volume and the expert workshop that was associated with it branched out in a new direction and rather than addressing specific components of an ITS or types of features approaches that could be included in ITSs it focused on how to apply an ITS for specific types of training The specific focus was on ITSs for Professional Career Education This topic area was selected as in general ITS research tends to be focused on K 12 or

college education and in many cases on domains such as algebra or physics. However, for the military and for industry trainees, are adult learners and domains tend to be more active, applied, and experiential. This workshop provided an opportunity for discussion of specific examples of applied training that occurs with ITSs as well as discussion of general approaches and considerations for applied professional education in ITSs.

Rethinking Language Education in the Age of Generative AI Zhongfeng Tian, Chaoran Wang, 2025-05-20. Rethinking Language Education in the Age of Generative AI bridges the gap between theory, research, and practice in AI and language education. Through conceptual pieces, empirical studies, and practical applications, this book provides critical insights and implications for reimagining language education in the age of generative AI. The contributors explore a wide range of issues, reflections, and innovations in AI and language education across diverse contexts, including English as a Second Language (ESL), English as a Foreign Language (EFL), foreign language learning, postsecondary pathways programs for international students, and language teacher education programs. Topics examined include critical AI literacy, GenAI-informed second language teaching and assessment, teacher and student perceptions, tool development for language learning, as well as ethical considerations, policies, and guidelines. The book incorporates interdisciplinary perspectives such as L2 foreign language studies, education, and applied linguistics, as well as global insights from countries like the United States, Canada, South Korea, Thailand, Indonesia, and the Philippines. This book is essential for students and researchers seeking to leverage AI to enhance language teaching and learning in innovative, critical, ethical, and responsible ways.

How to Enhance Learning Efficiency When Online Learning is Popular and Indispensable: Theory, Research and Practice Rong Lian, Chang Liu, Juzhe Xi, 2024-07-17. Online learning has become more and more common globally, whether for comfort, adapting to work hours, or just having the freedom to study from anywhere. And now, under the coronavirus pandemic, as people are having to stay at home, it has become more important than ever. Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere, it does not necessarily mean an increased learning performance. Relevant research in cognitive science has revealed possible limitations in online learning. For example, the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects, which makes it difficult for learners to form a systematic knowledge structure. Learners may experience cognitive overload, metacognitive illusion, and low learning efficiency in self-regulated learning. It follows that in the post-COVID-19 era, online learning puts forward new requirements and challenges to contemporary students, not only to their learning strategies but also to positive character traits in learning. Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation, then possibly leading to inefficient learning and increased learning burden. Therefore, it is necessary and important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays, based on which we could construct a theoretical model of an efficient learning model.
