**Producing and Directing the Short Film and Video** Peter W. Rea, David K.

Irving, 2015-03-24 *Producing and Directing the Short Film and Video* Fifth Edition is the definitive book on the subject for the serious film student or beginning filmmaker. Its unique two-fold approach looks at filmmaking from the perspectives of both the producer and director and clearly explains how their separate roles must work together to create a successful short film or video. Through extensive examples from award-winning shorts and insightful interviews, you will learn about common challenges the filmmakers encountered during each step of the filmmaking process: from preproduction to production, postproduction, and distribution, and the techniques they used to overcome them. In celebrating this book's twentieth anniversary, this edition has been updated to include two all-new in-depth case studies of esteemed short films: *Memory Lane* and the Academy Award-winning *God of Love*. A revised chapter progression that reinforces the significance of the actor-director relationship, interviews with the filmmakers integrated alongside the text, as well as new images and behind-the-scenes coverage of production processes, revamped sections on current financing strategies, postproduction workflows, and the wide variety of distribution platforms now available to filmmakers. A Where Are They Now appendix featuring updates on the original filmmakers covered in the first edition. An expanded companion website [www.focalpress.com/cw/rea](http://www.focalpress.com/cw/rea) containing useful forms and information on distributors, grants, and financing sources, film and video festivals, film schools, internet sources for short works, and professional associations.

*Adolescent Use of New Media and Internet Technologies* Gordon P.

D. Ingram, 2023-03-31 This book engages with contemporary and often polarizing debates surrounding the risks of adolescent use of digital media and internet technologies. By drawing on multiple research studies, the text synthesizes current understandings of the impacts of social network use, online gaming, pornography, and phenomena including cyberbullying, cyberstalking, and internet addiction to develop recommendations for the effective identification of at-risk youth, as well as strategies for informed communication about online risks and opportunities. It shows how media discussion of risks to children and teenagers from new technology is highly emotive and often exaggerated, rooted in the moral panic surrounding new cultural practices that young people engage in but which adults do not understand. Online risks are thus conceptualized as centering on three areas specific to adolescence which have undergone radical changes due to new internet technology. These include young people's identity, the types of content that are accessed, and social relationships. The author shows how these matters stem from the potential of new technology to establish new interpersonal connections, emphasizing how it brings opportunities as much as risks. As such, he provides a uniquely balanced discussion of potential dangers while also emphasizing the opportunities for social, academic, and personal growth which new technologies afford young people. It will be indispensable for researchers and clinicians interested in assessing levels of online risk, as well as scholars and educators with interests in cyberpsychology, social psychology, cyber culture, social aspects of computing, and media and adolescent development.
