**Artificial Intelligence and Blockchain in Precision Medicine and Virology** Jyotir Moy Chatterjee,Shailendra K. Saxena,2025-09-26 The book stands at the intersection of medical virology computer science engineering and artificial intelligence This interdisciplinary book seeks to harness the strengths of these fields to address the complex challenges of diagnosing treating and managing viral diseases Medical virology which studies viruses and virus like agents plays a critical role in understanding infectious diseases and developing therapeutic strategies However the field faces immense challenges due to the sheer volume and complexity of virological data which demands advanced computational tools for effective analysis and application Computer science engineering provides the technological backbone for this initiative Engineers in this field develop and implement sophisticated algorithms and data structures that enable the processing of large scale virological datasets In this context computer science engineering is pivotal for creating the

infrastructure necessary for deep learning and blockchain technologies Deep learning a branch of artificial intelligence involves training neural networks to recognize patterns in vast datasets enabling the discovery of insights that are otherwise obscured When applied to medical virology deep learning can significantly enhance the accuracy of viral diagnostics predict disease outbreaks and personalize treatment regimens based on the genetic makeup of both viruses and patients

*Biohacked* Brandon J. Weichert,2023-05-16 When COVID 19 erupted from Wuhan China under mysterious circumstances the Communist Party of China covered up its existence for as long as possible It is now apparent that there is more to COVID than what the authorities wish for us to know Biohacked China s Race to Control Life details the decades long pursuit by the Chinese Communists to dominate the biotechnology industry to control the very building blocks of life on Earth to further their political control at home and their supremacy abroad More appalling than the egregious cover up that China s rulers engaged in with COVID 19 is the fact that Western scientists pharmaceutical companies and research labs have contributed to China s rapid and dangerous growth in the biotech industry so much so that China not the United States may become the seat of the biotechnology industry The Chinese leadership believes that biotechnology is a critical industry for the Communist Party to achieve its China Dream of becoming the world s dominant superpower by 2049 In China s biotech sector truly macabre practices are being developed from ambitious cloning programs to the creation of potential pathogens that China s military plans to use in specific genetic attacks against Beijing s growing list of political enemies To stop the threat author Brandon J Weichert proposes the world s nations create a comprehensive set of treaties for regulating biotechnology research and development Further Weichert calls for Washington to slow the transfer of advanced biotechnology knowledge and funding from the United States to China using means like the Foreign Corrupt Practices Act and the Committee on Foreign Investment in the United States CFIUS Unless an all of government and society approach is taken to curbing irresponsible biotech development in China then another deadlier COVID 19 like pandemic could be at hand **Social**
